~THE GREATEST POTENTIAL~

There are a lot of people that are saying a lot about trends in the future of our world. There are signs of people cutting back but I believe that for those that God can use, He will, and wants us to move forward. This time in history now has the greatest potential to touch lives in these very interesting and unstable days. And guess what? God knew all this. God knows everything and there is no better place on this earth right now than to be one of His. God's positioning ministries and churches and people that will step up to the front lines. He has all the resources and every plan drawn up. What safer place to be right now than in the hand of the One who made you and gave you your abilities to use for the days ahead. God has a purpose for everything that ever touches the lives of one of His own and He will use it for His glorious purpose. God's kingdom is a solid foundation. It is built on the Rock, a great place for you to invest in the kingdom of God's work. It's time for the true church to step up and be counted. People are looking for truth and the kingdom of God possesses the truth. Jesus is the answer for today's trials and God's on the move. Let's stay with Him and go forward making a difference until our time transfers us to our real home.

Automotive Advice from the Under The Hood[®] Show

Dear Motor Medics,

I'm addicted to my seat heaters. Every car I have ever purchased has had them and it has even been a deal breaker for me when shopping for a car if it did not have them. I use my heaters year-round unless it is too warm out. My driver side seat heater just failed on my Cadillac and of course it is 2 months out of factory warranty. They would love to replace it for me at a charge of \$800.00 and that's just not going to happen. I am not ready to purchase a new car, but I want my seat heater to work. Is there anything I can do to get it going again?

Thank you,
Joe in Detroit Lakes Minnesota

Dear Joe,

I too enjoy my heated seats and when they fail, I would never think of spending \$800 just to keep my rear end warm. Good thing that there are alternatives out there. You could check with your local recycled parts place, AKA Salvage Yard, and they may have an entire working seat for you that will match your interior, or you could look into an aftermarket heater. Seat heaters are a great accessory for anyone who has a seat to sit on. Cars, trucks, tractors, they all can be equipped with heaters usually at a much lower price than a replacement factory unit. Check your local car stereo shops or accessory installation dealer to see if they offer them.

Take care,
the Motor Medics

Dear Motor Medics,

I had the air conditioning system fail on my Land cruiser two years ago due to a large leak in the rear refrigerant lines that run under the vehicle. Where the lines run, they are susceptible to damage from road debris and those concrete stops they put at the front of parking spaces. You know, the ones with the metal stakes holding them that my teenage daughter thinks is ok to drive over instead of backing up. So, after the cloud of refrigerant smoke cleared, I took it to both the dealer and an independent shop for a repair quote. Both places were over \$1000.00 to replace the lines. They said the lines come as a set and take many hours to replace. Is there anything I can do that won't cost me so much money?

Thank you,
Rich in Attica Indiana

Dear Rich,

Ouch! You have a few choices. You can do without air conditioning, you can spend the money for new lines, you could block off the rear lines and just use the front a/c, or you can repair the lines you have. There are a/c line repair kits out in the market that not all shops have but the ones that do will be able to cut out the damaged section and splice in a new one. You can also have a rear delete kit installed. Either one will be a large savings over having the entire line set replaced.

Take care,
the Motor Medics

Dear Motor Medics,

My 2004 Tahoe leaks enough oil on the ground that I could start my own refinery. I have had it into my local shop, and they tell me its leaking from the rear main seal and the front seal and timing cover and oil pan and valve covers too. I think that is almost every seal. It also leaks transmission fluid from the front seal and transmission pan. The Tahoe only has 110k miles on her and no rust and basically runs perfect but leaks. I am thinking of replacing the engine to stop the leaks even at 7k dollars its much cheaper than another used vehicle. What are your thoughts.

Thank you,
Joan in Cannon City Colorado

Dear Joan,

We can't stand oil leaks on a good running vehicle but there is no need to jump at a new engine just yet. If it runs great give it a once over checking compression and leak down and if it passes you could pull it and the transmission and reseal everything much cheaper than replacing the engine. While re-sealing, we suggest a new timing chain, valve seals, and drives side valve cover as these are all high failure items. If you can get the oil leaks to all stop you can turn this back into a vehicle that could possibly give you many more years of life from it saving you a lot of money VS replacing the engine in a vehicle with fairly low mileage.

Take care,
the Motor Medics

Dear Motor Medics,

I drive a 2013 Chevy Camaro Rear wheel drive. I wish they made it with AWD like the Dodge Challengers option. This is my only car and since I moved from Texas to Minneapolis two years ago I have been stuck, literally in the snow because its my only car many times. Sometimes I have not even been able to get out of my parking space at work and one time had to leave the car there and take an UBER to my home. I cannot afford to purchase another car at this time, so I need to do something to get better traction. I talked to one tire store who told me that I can by the wide snow tires for over \$200 each for the rear but they suggest all four and they say that they do not think it will do much good though. What can I do to help with the traction?

Thank you,
Sharon in Minneapolis Minnesota

Dear Sharon,

Driving a Camaro or another performance vehicle like a Mustang or a Challenger without all-wheel drive can prove to be a tricky situation. We have a Camaro for our Under The Hood radio show as a show car. We have found that not just snow tires but also the narrowest wheels available for the car to match a narrow tire turned our car into a very capable snow machine. Talk with a tire store about both wheels and tires for more traction.

Take care,
the Motor Medics

CLASSIFIED QUICK TIPS

Prepare. Know what is important to readers shopping in your classified category.
Make Your Copy Complete. Use ad copy effectively to thoroughly communicate to potential buyer(s). Organize the ad carefully. Space and punctuate, so that the reader can follow the ad and understand its content.
Be Creative Descriptive. List major selling points (price, color, size, features or options).
Be Factual. Be Helpful. Include hours of operation, best days and times in which to make contact as well as area code on phone numbers.
Make Your Ad Easily Recognizable. Choose a main benefit of your merchandise and feature it in a headline. Use art, large type sizes, bolding and best of all, use white space to make your ad visually attractive and so powerful, it's jumping off the page.
Maximize The Amount Of Prospective Buyers/Readers. Multiply insertions help prospective buyers/readers REMEMBER the ad because of repetition. Take advantage of discounted rates available for multiple insertions.
Urge The Reader To Act Now! Every ad should include a strong bid for action. Stimulate prompt action by using such phrases as "Call Now", "Available Immediately" or "Won't Last".

The Big Nickel hopes these tips will help you, please call 417-624-4100 and our telephone sales representatives will be happy to assist you.
