GODS POSITION~

If the devil has turned up the heat in your life, then as a Christian, God has had to of given His permission, by either you giving Satan some type of access and wants to grow your abilities in Faith or you have given Satan access. Regardless whatever Satan means to do will be for evil intentions, but God intends to bring good for the life of any of His children.

Let this time bring out the best you show for God. Praise Him even in the matter. Get God involved in your problem with you. Praise Him no matter the thoughts you might have. Believe in His faithfulness to be there with you and always keep in mind that God is always in charge and don't forget that others are watching you in those times. So demonstrate your faith in God in the midst of this trying time and praise God even in the darkest moment.

If you will allow God into your problem, you'll be able to bear them and you will beat them. Don't give up. Stay in the battle until God brings the matter to its knees.

Proclaim God's goodness to even hell itself. God is bigger and greater than your circumstance. Praise Him. Get God in the problem with you and He will stay there. He will not forsake you and leave one of His children to fight their battle alone. Don't focus on your trial. Praise God over it. Satan's only real form of power is deception. He will lie to. He will rob your joy. He will try to destroy your hope. Don't focus on his threats. Focus on God's word.

God's position is the ultimate victor. Always believe God regardless. You'll find your strength at all times in God. Just praise Him for you'll have victory.

ASK THE MOTOR MEDICS[®]

Automotive Advice from the Under The Hood[®] Show

Dear Motor Medics,

I recently heard you talking about timing belts on your radio show and how everyone with a vehicle should find out if theirs is equipped with one and what the recommended service interval was. I asked my local shop if I had one and they said I do and in fact it was past due by almost 10,000 miles. My vehicle is a 2012 Honda Accord. I have owned it since new and have never had it changed to my knowledge unless it was part of some service package. Is a timing belt something I can do myself at home with basic hand tools? I have changed other belts. If I don't do it the correct way can I damage something or can I just take it to a shop to have them finish it?

Thank you,
Craig in Kittanning Pennsylvania

Dear Craig,

Yes a timing belt can be changed at home on many vehicles but specialty tools are required for some. Before you start any home-project make sure you are very familiar and comfortable with the job ahead of you and follow all safety procedures. A timing belt is a job that requires very close attention to procedure. If the belt comes loose or is not installed correctly and the engine becomes out of time it can spell disaster for the engine. It can even mean having to replace the engine in some cases. Study the job closely before attempting this one.

Take care,
the Motor Medics

Dear Motor Medics,

I'm getting ready to send my son off to college in a used car we found. We had a used car inspection done before we purchased it and a couple items were found that we took care of after the purchase ourselves. My son and I have spent a lot of time together doing small mechanical projects and I think he can take care of the small things that may come up on his own while he is away. For anyone who may be traveling away from home what kinds of items do you suggest to have stored in the vehicle for small emergencies?

Thank you,
Robert in Holdrege Nebraska

Dear Robert,

If you're a well-seasoned mechanic or everyday driver having an emergency kit in the vehicle is a great idea. Even if you don't use it yourself it may come in handy for others you come across. Everyone will have a different idea and some personal choices but here are some basics. Jumper cables for sure, a small (empty) fuel can, to prevent a fire, fire extinguisher and basic hand tools. Keeping a small basic kit does not take up much room and can be used for many repairs. A flashlight with extra batteries and some type of signal to warn people if you are disabled in the dark like an illuminated triangle set. These are all in addition to the vehicles jack and tool kit and any other items that you have found.

Take care,
the Motor Medics

Dear Motor Medics,

I live in an area where we have winter road conditions and see many cars that end up either spun out or in the ditch and some that rear end others. The question I pose to you is about stopping and handling. Recently I started paying close attention to the types of vehicles that were involved in these incidents and I noticed that almost all of them were noticeably older than the ones that had not been involved in the mishaps. Is there a connection between age and lack of control or is it just a coincidence?

Thank you,
Dale in Des Moines Iowa

Dear Dale,

There's a connection between age and control. Many things contribute to how a vehicle stops. When tires are new the tread is deeper, so they shed water and cut through snow better and maintain a firmer grip on the road. A tire that is older with half its tread will have a much greater stopping distance. Also, suspension plays a big part. Most people don't replace shocks and struts unless they are bouncy but before you feel the extra bounce, they will start to lose their ability to keep the tires in contact with the road as they once did. Many newer vehicles also have elaborated electronic stability control systems. The best way to be sure your car is performing at its best ability is to consult with your mechanic about your vehicles condition on a regular basis.

Take care,
the Motor Medics

Dear Motor Medics,

My questions about wipers on both the front and rear of my vehicle. I have a 2004 Chrysler Town and Country and the front wipers have stopped working three years in a row now in mid-winter requiring replacing the wiper motor each time and the rear wiper never seems to wipe the glass completely. The blade has been replaced at least three times and it only works for a few weeks before it starts wiping poorly in the center.

Thank you,
Jack in Windom Minnesota

Dear Jack,

Because of the time the wiper motor is failing I suspect it may be due to the load of ice on the blades. Winter is brutal on wiper systems. It is extremely important that before you turn your wipers on you make sure that they are not stuck to the glass or bound by heavy snow. Clear the glass with a window scraper if necessary and lift the blades by hand to check them. If they are restrained in any way the motor will bear the load and may fail immediately. If you have a remote starter don't forget to turn off the wipers before you get out of the vehicle. Many people damage the system by forgetting them and when the vehicle starts so do the frozen wipers. As for the rear blade it may be the arm. The arm will lose tension as it ages and won't keep the blade in contact with the glass.

Take care,
the Motor Medics

FOR ENTERTAINMENT ONLY • Always consult your local shop and follow all safety procedures before repairs.
