~ Have You Died To Self~

It is easier to die than to live. Many people believe this and at times make decisions that will prove them wrong. The best way to live is to first give yourself 100% to God and live to bring Him glory. When you will put aside the desires of pleasing the flesh then the Spirit of God has real room to work to your best.

Do you love God? Have you sold out to His ways of living toward His will to be done? What's really important to you? Just how much does God have of your life? God's choices are worldwide. It is God who chooses the people He puts on the earth. It is God who establishes His plans for each of us.

It is God who makes all the provisions for each person so that they can complete His purposes and then it is God who will present that opportunity to each of us. And then it is we who must make our own decision to follow God and accept His offer or to choose our own desires and make our own choices. God gives you and me a free will and by how we respond determines greatly our future.

God will always accomplish His plan. He will place people in positions to assist Him. But again, God gives us the right to choose who we will serve. So many in this world miss the best parts of their lives all because they chose to do things their way, yet never truly experience the greatest gift God wants them to have.

ASK THE MOTOR MEDICS®

Automotive Advice from the Under The Hood® Show

Dear Motor Medics,

I will be ready to purchase a new car soon and will need to sell the one I have. I'd like to know how I can get the best resale value for my car and how to go about finding out how much that number should be.

Thank you,
Darlene in McCook Nebraska

Dear Darlene,

When you want to get the best resale value at the time of sale you should start at the time of purchase. Along the way keep all records of anything done to the car to show the care you have given it. A well cared for vehicle will bring more than a neglected one. Follow the severe service maintenance recommendations in the owner's manual and when things break, have them fixed. If you have done none of these things or just a few you can still get good value for your car. A clean car will usually bring more money faster than a dirty one and often people buy on impulse because of looks alone. A complete professional detail is usually in the \$100 range. Once it's clean and ready to sell set your price. Selling it privately will usually bring the most money. To get a good estimate of what you should ask, check the local papers and car lots for similar mileage and condition vehicles. This will give you a real-world estimate for the location you are in as prices can vary between markets.

Take care,
the Motor Medics

Dear Motor Medics,

How often should I replace the shocks and struts on my vehicles? Is there a time or mileage limit to follow and is that a rule or can they be checked? My current 5-year-old minivan has never had them replaced, has 110,000 miles, and I plan on keeping it another 3 years or so.

Thank you,
Scott in Fort Morgan Colorado

Dear Scott,

Shocks and struts play a vital role in the ride comfort and safety of your vehicle keeping your tires in contact with the road and smoothing the ride. When they start to fail you may feel more bounce in the suspension or even feel the chassis bottom out over hard bumps. Usually before you feel the bounce braking distance and handling will be decreased. As they age the compressed gas/oil mixture that is used internally will begin to leak, first the gas which goes unseen and next the oil which can usually be detected leaking down the body of the units. Any sign of leakage or excessive bounce indicates that it is time for replacement. Mileage wise at about 50,000 miles or so they will start to lose performance. If you were to drive a vehicle with new units then drive yours, you would probably see a noticeable difference. This difference can mean shorter stopping times, better handling, and a smoother ride. For your vehicle with 110,000 miles and five years it is time for replacement.

Take care,
the Motor Medics

Dear Motor Medics,

I drive a 2014 Ford F150 with a 5.4 engine and I have installed a lot of accessories because I use it as a pilot car, and I take it camping often. When I am on the road, I camp probably 30 times a year. My problem is with the battery. I am on my second battery in the truck and I feel they should last longer than they are, but I need your advice as to which battery would be the best choice. I have seen new batteries lately called AGM batteries but do not know what they are. Are they better?

Thank you,
Bill in Branson Missouri

Dear Bill,

AGM batteries stand for Absorbed Glass Mat and it is not a new technology, but an exceptionally good one that is coming down in price and is showing up in more batteries every year. AGM is a proven, very good strong battery design. AGM batteries typically can be discharged further and recharged fully more times than a traditional lead acid type battery and they work very well in the cars we have today with lots of either factory or aftermarket electronics added to them. These batteries are also less prone to leakage like a wet acid filled battery. We use them in many of our vehicles and we have installed them in our shop when a customer has a similar situation to yours and they need the absolute best possible battery that they can get.

Take care,
the Motor Medics

Dear Motor Medics,

My 2016 Ford Escape has a braking problem. When I drive it on a short trip, less than 50 miles and apply the brakes, it shakes just before a stop. I mean as I approach the stop sign just before I stop at about 3 mph the brake pedal shakes and I lurch forward, and I am afraid that I may crash into the car in front of me. The shop cannot duplicate the issue and I do not know what to do.

Thank you,
Carry in Sheldon Iowa

Dear Carry,

Having a loss of brakes is always an uncomfortable and scary situation. We have experienced what you are going through before. The Ford Escape is not the only vehicle that this has happened to. Many cars and trucks with ABS which now encompass most every vehicle on the road have great braking systems but when they fail, any number of safety issues can come up. The one you have is most often caused by one or more of the wheel speed sensors not sending the proper signal to the ABS computer. If the computer thinks that one wheel is stopping faster than the others it releases pressure to that wheel and the car moves forward for a short time until the other wheels catch up. Often it is a simple sensor or wire that needs repair. As with any safety system it should be repaired right away, and it may take more time at the shop.

Take care,
the Motor Medics

FOR ENTERTAINMENT ONLY • Always consult your local shop and follow all safety procedures before repairs.

ANY ANNOUNCEMENTS THE DAY OF AUCTION SUPERSEDE ALL PRINTED MATERIAL

CLASSIFIED
QUICK TIPS
WRITING A
SUCCESSFUL AD

Prepare. Know what is important to readers shopping in your classified category.

Make Your Copy Complete.

Use ad copy effectively to thoroughly communicate to potential buyer(s).

Organize the ad carefully. Space and punctuate, so that the reader can follow the ad and understand its content.

Be Creative Descriptive.

List major selling points (price, color, size, features or options).

Be Factual. Be Helpful.

Include hours of operation, best days and times in which to make contact as well as area code on phone numbers.

Make Your Ad Easily Recognizable.

Choose a main benefit of your merchandise and feature it in a headline. Use art, large type sizes, bolding and best of all, use white space to make your ad visually attractive and so powerful, it's jumping off the page.

Maximize The Amount Of Prospective Buyers/Readers. Multiply insertions help prospective buyers/readers REMEMBER the ad because of repetition. Take advantage of discounted rates available for multiple insertions.

Urge The Reader To Act Now!

Every ad should include a strong bid for action. Stimulate prompt action by using such phrases as "Call Now", "Available Immediately" or "Won't Last".

The Big Nickel hopes these tips will help you, please call 417-624-4100 and our telephone sales representatives will be happy to assist you.

Turn Your Clutter Into Cash
