~THE GREATEST POTENTIAL~

There are a lot of people that are saying a lot about trends in the future of our world. There are signs of people cutting back but I believe that for those that God can use, He will, and wants us to move forward. This time in history now has the greatest potential to touch lives in these very interesting and unstable days. And guess what? God knew all this. God knows everything and there is no better place on this earth right now than to be one of His. God's positioning ministries and churches and people that will step up to the front lines. He has all the resources and every plan drawn up. What safer place to be right now than in the hand of the One who made you and gave you your abilities to use for the days ahead. God has a purpose for everything that ever touches the lives of one of His own and He will use it for His glorious purpose. God's kingdom is a solid foundation. It is built on the Rock, a great place for you to invest in the kingdom of God's work. It's time for the true church to step up and be counted. People are looking for truth and the kingdom of God possesses the truth. Jesus is the answer for today's trials and God's on the move. Let's stay with Him and go forward making a difference until our time transfers us to our real home.

PUZZLE-SODOKU

Here's How It Works: Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

ASK THE MOTOR MEDICS®

Automotive Advice from the Under The Hood® Show

Dear Motor Medics,

I am having trouble with my 2001 Buick Lesabre. For the past few weeks I have not been able to adjust my inside temperature properly. When I first start the car and whenever I adjust the temperature controls, I hear a clicking under the center of the dash that last about ten seconds. It started as a once a week thing but now happens every time. Since this started happening the temperature seems to either stick on full hot or full cold. The car has adjustments for both driver and passenger side temperature and both sides cause the noise when adjusted.

Thank you,
Susan in Vandalia

Dear Susan,

The noise is likely coming from the temperature blend door motors. The temperature is adjusted by means of electric motors with gears connecting them to the temperature doors. The climate module measures the temperature of the air and the setting on the dash and adjusts the motors as needed. With age the sensors that report the position of the motors wear out and when the door reaches full hot or cold the module tells them to keep going and you hear the sound of the gears as they are pushed too far. If you find that this is the problem the fix is to replace the actuator motor. Some motors can be accessed under dash while others require more extensive disassembly. Most new blend door motors are affordable, used are also a good option.

Take care,
the Motor Medics

Dear Motor Medics,

My new job has taken me to an unfamiliar city hundreds of miles away from home where I don't know anyone. I have a good running car but I owe that to the great care that my repair shop has given me over the years. It's a 2005 Taurus with 98,000 miles. This car has not needed any major repairs in the past but on the way across country the air conditioner stopped working. I can live without air for a short time but I want to get it fixed. How can I find a good shop? I am afraid to just walk into the first shop I see. I am a young woman that knows little about cars so I need some guidance. Can you give me a suggestion on how to find a shop in an unfamiliar town?

Thank you,
Mary in Denver

Dear Mary,

Many people find themselves in this situation. Maybe it's a child who has moved for school needing a good shop for repairs. Hopefully you will have contact with people you can trust when you arrive. Ask them where they go then narrow the shops down to just a few by the ones with the best word of mouth reviews. Then maybe visit the shop for an oil change and ask the other customers waiting how they like the shop. If you don't like what you hear try another. It's a little like finding a doctor.

Take care,
the Motor Medics

Dear Motor Medics,

I've been listening to your show "Under The Hood" on my local radio station and have heard a lot of talk about gasoline and changes that have happened to it over the years and some new ones coming that we have seen here locally involving octane changes. The fuel in our pumps has changed and we now have a lower octane rating that before. I have always just used the cheapest fuel when gassing up my car but after listening to you I wonder if I would be better served using something else. I heard you suggest the higher octane to a listener to prevent engine damage. Should I be worried about my car? I drive a 2006 Ford Taurus that's not a flex fuel vehicle.

Thank you,
David in Muskegon Michigan

Dear David,

Thanks for listening to Under The Hood and for reading the column. Fuel has changed and we are seeing a drop across the board in octane and prices all over the place. The first place to start is with your owner's manual because you want to know what the manufacturer of your car calls for. If they recommend a minimum 87 octane or 89 octane, then that is the lowest you should use to protect the vehicle. Using fuel with lower ratings than manufacturer recommended can cause spark knock which is potentially harmful to the engine and too high is a waste of money so always consult the car owner's manual.

Take care,
the Motor Medics

Dear Motor Medics,

I own a 2011 Chevy truck and car. They both have an oil change reminder light that tells me when the vehicle needs to be serviced. I have noticed that the time of service for these two vehicles can range up or down as many as 3000 miles on a change and frankly it worries me. My dealership where I do all my work has told me that I should follow the reminder on the dash no matter what and that I don't need to change it earlier but that has been 9000 miles on the truck and 6000 on the car and that just goes against all I have ever been taught on my vehicles.

Thank you,
Charlie in Bowling Green Kentucky

Dear Charlie,

When we saw oil change intervals this high we got nervous too. The system takes into account things like engine temp, idle time, mileage and much more to determine change intervals so it's a "Smart System" but not foolproof. It can't tell what oil you use. Don't skimp on the oil type. You need to use what is recommended by the manufacturer because that is what they base changes on. The factory recommended engine oil is made to last much longer than standard conventional oils and is formulated for long life. It doesn't have to be theirs but has to meet their specs. Using a cheap oil will reduce miles between changes and can affect your engine warranty.

Take care,
the Motor Medics
