### -PUZZLE- SODOKU -JULY- WEEK 2

Here's How It Works: Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

**~ Who Are You ~**

God does not expect perfection in His people but God does expect obedience and it is through obedience that God can take our failures and turn them into a positive outcome. Some people are thinkers, others are doers. There are people who are very sociable and others more reserved. Most people are followers but some are leaders. A few people are even ahead of their time but most are not. There are people that are very athletic, yet most are average. Some are geniuses but they are few.

There are people that are great speakers, some even for God, but not many. There are those people who have many talents and others who have just one. Yet, regardless of how great, or average, different individuals are, they are all equal before God. And He has placed a purpose within them, a very special reason for their existence. And that is you, too. God has given you an assignment or maybe more than one. So, the question – are you doing it?

At the end of your life, you will not be judged according to perfection but you will be judged by what you did with your talents, not money and time but more importantly, the position of your heart toward God, that you cultivated a relationship with His Son, Jesus. Who, also, will be the final Judge and He will know what kind of relationship you and He have. This will determine your forever destiny. Make sure you evaluate what you are doing now so that you'll be ready. You never know when you will be called from this earth. So be ready.

# ASK THE MOTOR MEDICS®

Automotive Advice from the Under The Hood® Show

Dear Motor Medics,

We have a 2008 Chevrolet Tahoe and when it was just a year old, we got a new puppy. The first time we left it alone while we went inside a restaurant to eat, she decided to eat the Tahoe. She chewed the back of the rear seat and the corner off of the plastic trim too. The vehicle is in great shape with 70,000 miles and we want to sell it, but with a large hole in the seat and the damage to the plastic side trim it's making the sale very difficult. We checked with the dealer and they are telling us they can repair it at a cost of over \$3500.00 parts and labor and our insurance will not cover repairs. Can you suggest anything that we can do in the way of a repair to save some money?

Thank you,  
David in Watertown, SD.

Dear David,

New interior parts can be very expensive so many people leave their vehicles unrepaired. What's wrong with a seat and trim from another Tahoe of the same year that has no damage? Look into certified used parts. Ask your dealer if they can find these parts so you can get a repair that makes more financial sense. With the hundreds of reliable used parts sources in the country they should be able to find a match for a late model vehicle like yours and make the repair affordable. There is always a way.

Take care,  
the Motor Medics

Dear Motor Medics,

We have a 2012 Hyundai Santa Fe that has been having the check brake light come on periodically. The fluid tank slowly drains so we fill the brake fluid and it works fine for a while then comes on again. We had a mechanic look at it and tell us we would have to replace the HCU in the brake system and that the part alone is about \$1600.00. Is this a common problem and does this sound reasonable? Is there anything else we can do? I'm a little hesitant to spend so much on a repair on a 10-year-old vehicle, when the value is maybe a little more than twice the cost to repair the problem.

Thank you,  
Kay in Nebraska

Dear Kay,

The HCU is the Hydraulic Control Unit and it's the main component of the antilock brake system. The units don't tend to leak fluid but rather fail electrically so I would take a very close look at the lines going to the unit which are more common to fail. Shop around for brakes. A second opinion never hurts if you have any question and by asking us, we assume that you do. When you have an older vehicle or any vehicle for that matter it is important to keep repairs economical but it's also important to be safe. Brakes are not an area to cut corners on but there are always ways to save money when repairing them.

Take care,  
the Motor Medics

Dear Motor Medics,

I recently heard you talking about timing belts on your radio show and how everyone with a vehicle should find out if theirs is equipped with one and what the recommended service interval was. I asked my local shop if I had one and they said I do and in fact it was past due by almost 10,000 miles. My vehicle is a 2012 Honda Accord. I have owned it since new and have never had it changed to my knowledge unless it was part of some service package. Is a timing belt something I can do myself at home with basic hand tools? I have changed other belts. If I don't do it the correct way can I damage something or can I just take it to a shop to have them finish it?

Thank you,  
Craig in Kittanning Pennsylvania

Dear Craig,

Yes a timing belt can be changed at home on many vehicles but specialty tools are required for some. Before you start any home-project make sure you are very familiar and comfortable with the job ahead of you and follow all safety procedures. A timing belt is a job that requires very close attention to procedure. If the belt comes loose or is not installed correctly and the engine becomes out of time it can spell disaster for the engine. It can even mean having to replace the engine in some cases. Study the job closely before attempting this one.

Take care,  
the Motor Medics

Dear Motor Medics,

I'm getting ready to send my son off to college in a used car we found. We had a used car inspection done before we purchased it and a couple items were found that we took care of after the purchase ourselves. My son and I have spent a lot of time together doing small mechanical projects and I think he can take care of the small things that may come up on his own while he is away. For anyone who may be traveling away from home what kinds of items do you suggest to have stored in the vehicle for small emergencies?

Thank you,  
Robert in Holdrege Nebraska

Dear Robert,

It you're a well-seasoned mechanic or everyday driver having an emergency kit in the vehicle is a great idea. Even if you don't use it yourself it may come in handy for others you come across. Everyone will have a different idea and some personal choices but here are some basics. Jumper cables for sure, a small (empty) fuel can, to prevent a fire, fire extinguisher and basic hand tools. Keeping a small basic kit does not take up much room and can be used for many repairs. A flashlight with extra batteries and some type of signal to warn people if you are disabled in the dark like an illuminated triangle set. These are all in addition to the vehicles jack and tool kit and any other items that you have found.

Take care,  
the Motor Medics
