### Fun By The Numbers

Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

5			7	9				
	8	9				5		
7								9
5		4	2	6				7
	7	6						
			8				6	
4	9		3		1		2	
					2	8	4	

Level: Intermediate

**Here's How It Works:**  
Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

**~ False Agendas ~**

When we get distracted from God's purposes for us then we will devalue God's word. Because distractions will cause you to miss God's instructions and to focus on issues that are not real or relevant to the understanding of who God is to be in your life.

False agendas can be developed that cause people to pick apart God's word to tell them to believe deceptive ways and to spread it into other's lives as well. Activities that are devoid of God's true character and offer a fake hope which marginalizes God and His place above the world and even in our own heart.

Blessed are those who only walk in the whole counsel of God and avoid falling into the traps of the cares of this world. What a Christian must display is a much higher type of Christianity, than what most people profess. If you are going to call yourself a Christian then you must deny yourself of those areas that are separating you from God.

If not, you will gradually become more and more like the world around you, placing you farther and farther away from God which will eventually lead you toward more discouragement, more fearfulness and concerns that will trouble your soul and cause you to stray away from God and move you toward the devil's hands never realizing it until it is too late.

# ASK THE MOTOR MEDICS®

Automotive Advice from the Under The Hood® Show

Dear Motor Medics,

I have a 2005 Buick Lesabre and under the back of the vehicle there are what appears to be shock absorbers and they have air lines attached to them. They both are leaking what I assume is oil and I hear a noise that lasts for about four minutes each time I start the car. This noise used to last only about 10 seconds if it happened at all. I have several questions. Does this mean the shocks are bad? Is the noise I hear the air compressor that fills the shocks? Can I let it go for a while because it seems to still ride well? How expensive is it to repair this problem?

Thank you,  
Gary, in Sheldon Iowa

Dear Gary,

You have load leveling shock absorbers in back which means they not only control the firmness of the ride but they level out the vehicle when extra weight is added to it. When a shock leaks or the vehicle has excessive bounce, it is an indication of the need for replacement. Oil is used in the dampening of the shock and when it leaks out the shock can no longer control the bounce compromising your safety. If you leave the shocks the way they are the compressor which you hear running will eventually burn out and be very expensive to fix. These shocks are usually available at most parts stores for a reasonable price and take about one hour to replace.

Take care,  
the Motor Medics

Dear Motor Medics,

Our 16-year-old twins have just started to drive and we're a little worried. We took your advice about finding a used car and having it inspected before we purchased it and were able to negotiate repairs for some safety issues on one of them before we took possession so we are ok with the cars. What we are worried about is that in addition to the car we supplied our children with new cell phones. We have lectured on the dangers of texting and driving more than once but with the large number of messages sent daily from their phones the temptation is too great. We have seen them texting as they drive away and pull in so we know it is happening. We don't want to take away the phones because we feel much safer when we can contact them but we cannot allow them to use the phones while driving. Do you have any suggestions?

Thank you,  
Ron and Diane in Henderson Texas

Dear Ron and Diane,

There is a device available that will disable the phone when their vehicles are in motion. It will shut off all functions like text, email, and calls but allow 911 to be dialed in an emergency. The device is simple to install at home and if disabled it will send you an email alerting you of the disconnection even if it is reconnected. The device is called Cell Control, internet search for it.

Take care,  
the Motor Medics

Dear Motor Medics,

During my last oil change my shop told me I needed to change my cabin air filter. I did not know my car had a cabin air filter or even what one was until they showed me my dirty filter. They did not charge me much to replace it and my air seems to blow much stronger now. We had a Windstar van that gradually lost air flow from the vent too and I wonder if it had one that was clogged. My question is can they be changed at home by the average Joe and how often should they be changed?

Thank you,  
Mike in Williamsport Pennsylvania

Dear Mike,

Cabin air filters are appearing in more vehicles every year. They not only keep the dirt out of the inside of the vehicle, they keep the HVAC system components clean so they last longer. The filters are a great idea but until everyone knows if they have one and how to care for them, they can be a hindrance. If the filters are not changed you can lose airflow like you experienced and in the worst-case damage may occur to the system. When buying a vehicle ask if it is equipped with a cabin air filter and where it is located. Filters are available at most parts stores and can usually be changed at home in a short amount of time for a reasonable cost. Check the manual for filter replacement intervals.

Take care,  
the Motor Medics

Dear Motor Medics,

I have a question about those do it yourself air conditioning recharge kits you can find at many auto parts stores. I have lost some of the cooling capacity of my air conditioner and don't want to spend the money to have a shop check it out. Am I safe to just go buy one of those kits and recharge the system myself so I can get some cool air, and is there any risk of damage to my vehicle if I do it wrong?

Thank you,  
Dale in Dallas Texas

Dear Dale,

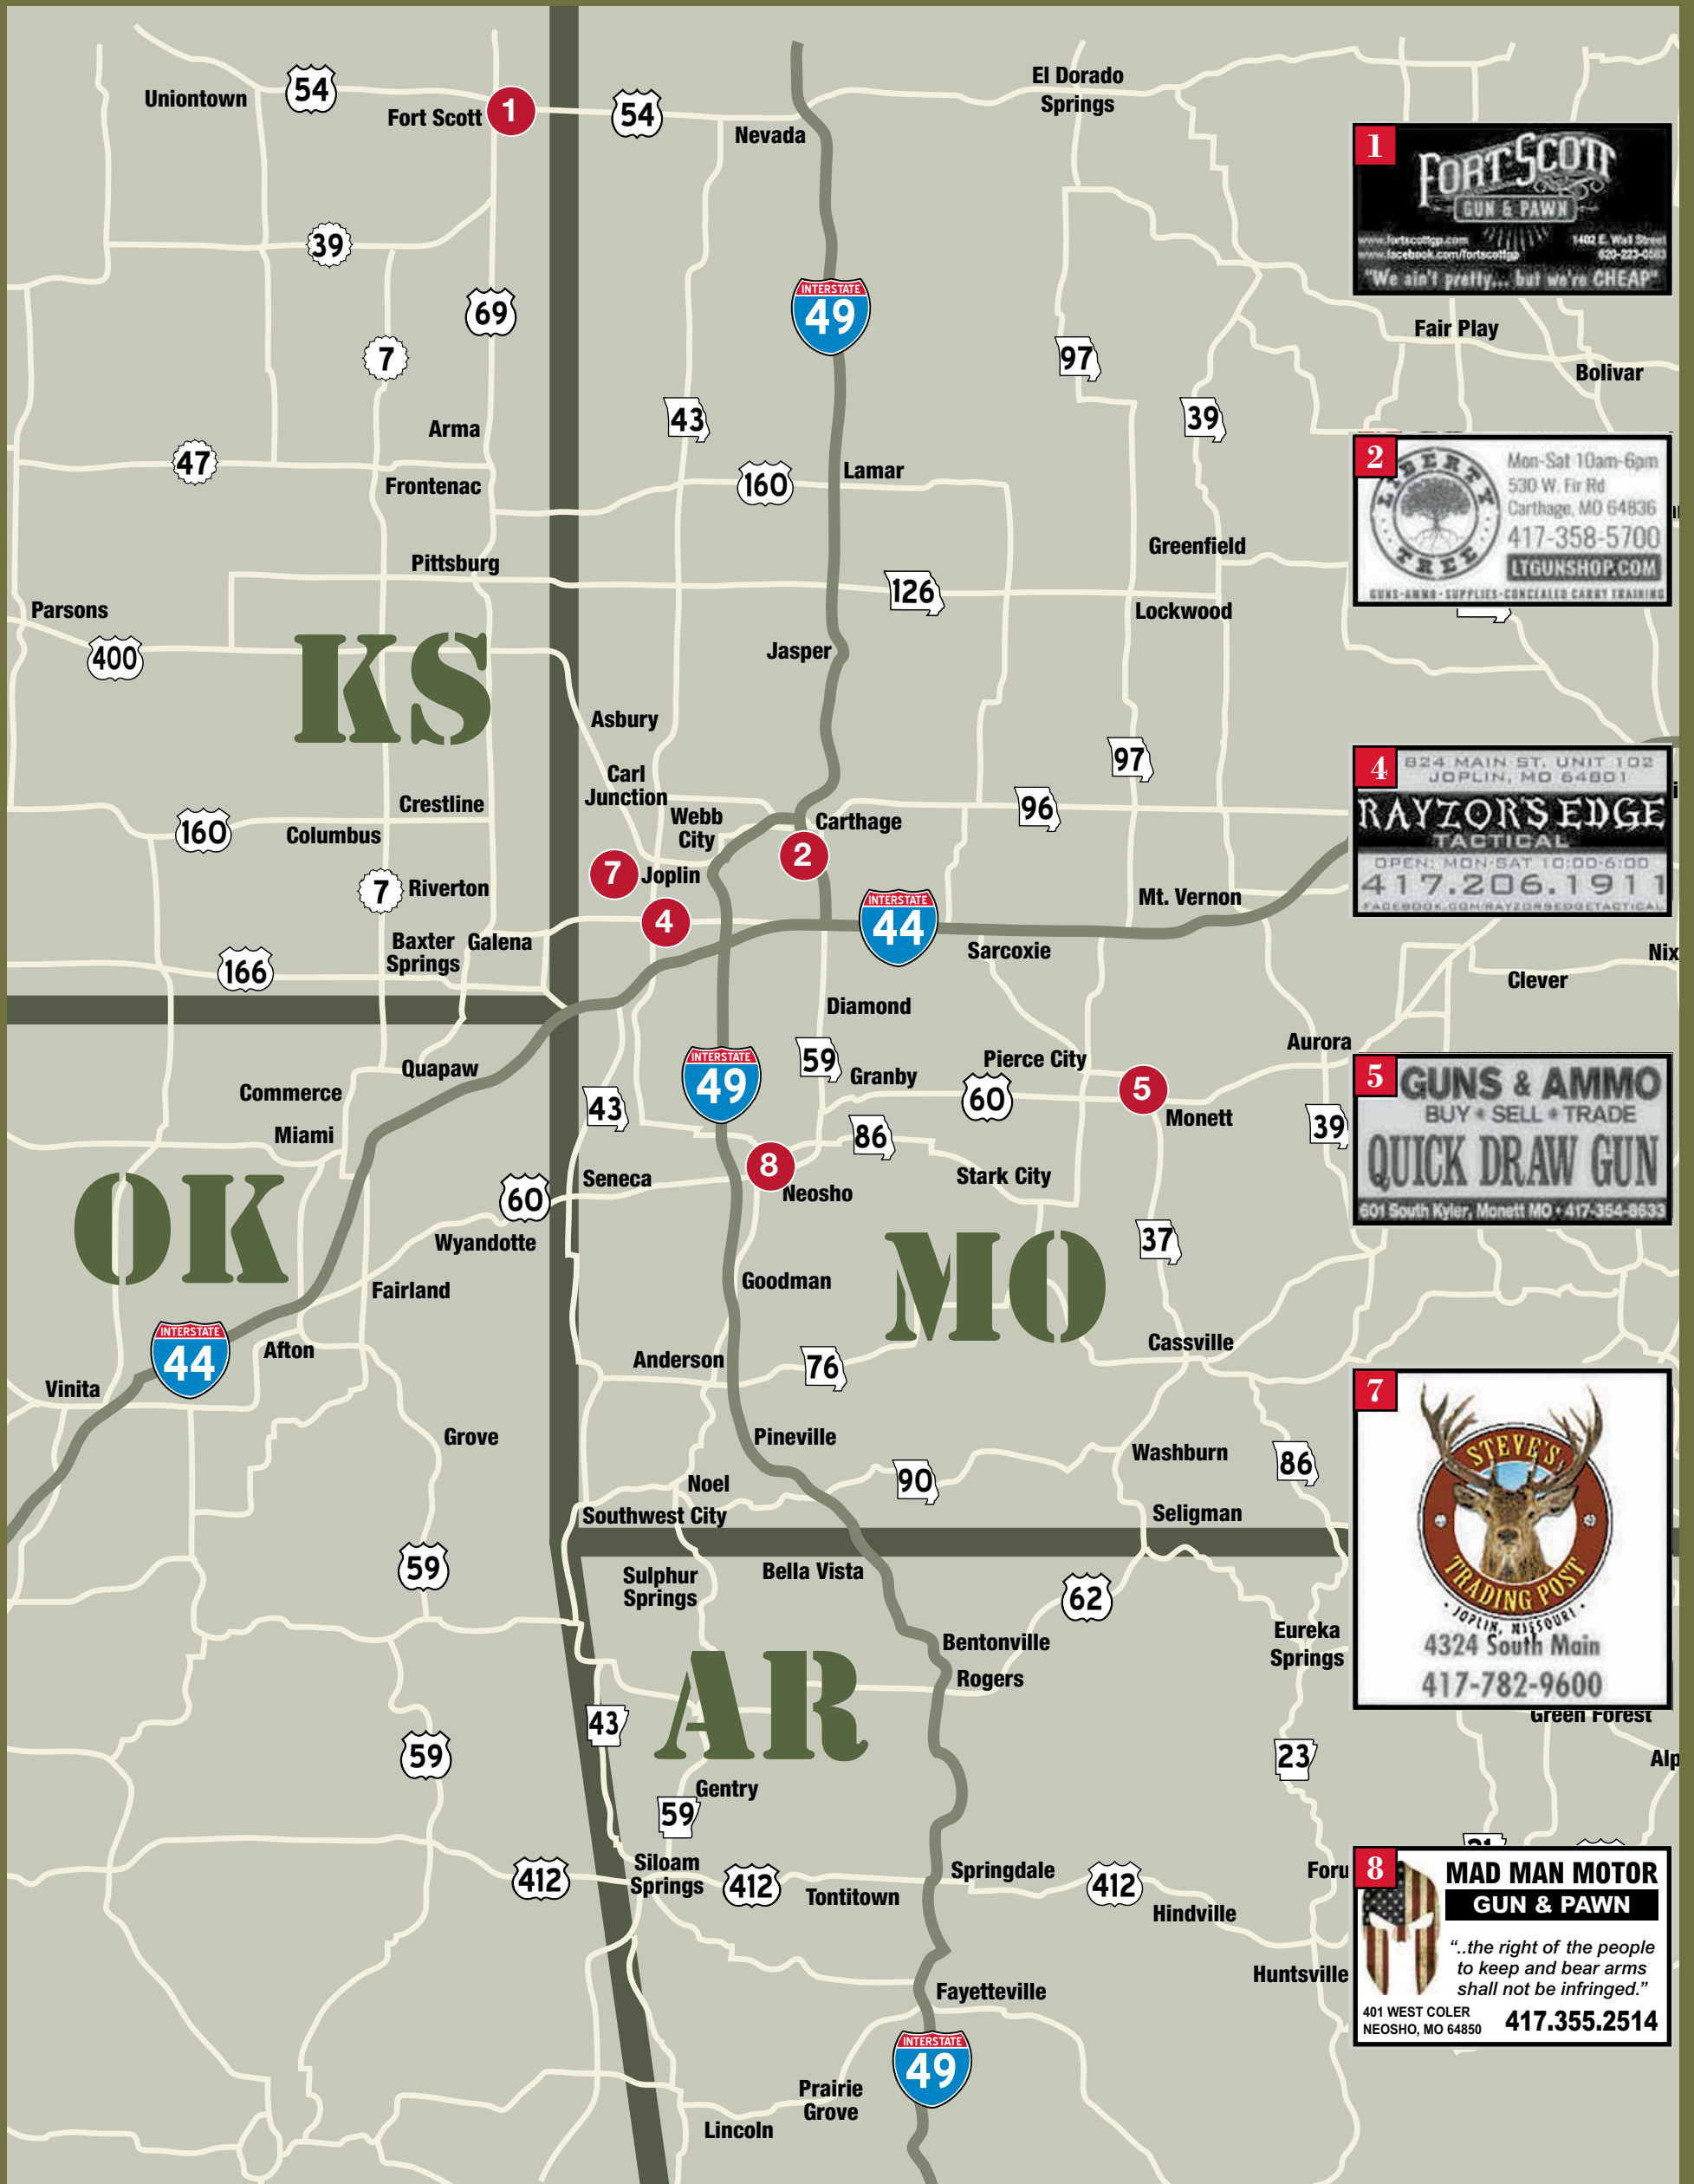

Air conditioning is not hard to work on with the proper tools, training, and equipment. One of the most basic tools we use for testing is a set of gauges to read system pressures. We can tell a lot about the system just from the readings we take. If you attempt to charge a system without being able to read the system pressures on both low and high you run the risk of system damage. Just pumping in refrigerant is not the answer. Yes, there are people who use the kits and have had good luck but we see many vehicles that have been charged with a do it yourself kit come to our shop for repairs that could have been cheaper if done professionally in the first place. Do some heavy research and ask plenty of questions before you just add refrigerant using a do it yourself kit.

Take care,  
the Motor Medics
