~ The Convenience of Crisis ~

Someone once said never miss an opportunity to accomplish your purpose with a crisis. There have been some who will and have taken advantage of situations to promote their agendas and establish their plans to be in charge, to become the ruling authority over people (companies and nations). Crisis can come in forms of disasters or manmade.

All crises that take control of people are orchestrated by and attached to the heart of Satan and is a demonic move put together and directed by forces of darkness that want to reign over the souls and lives of people of all ages. They don't care who is destroyed or what damage is done. These people come in all shapes, colors and ethnic backgrounds, from business to religion and of course politics.

Today all over the world people in authority positions have taken advantage of a situation where they can manipulate circumstances. These types of actions are from a rebellious dark spirit that they have given themselves over to exert power and make people do what they want so that they can have control.

All of this is tied directly to hell. Satan's handprints are all over what is going on in the world that is making great efforts to take over the world. Especially America to unroot Christianity and sever the influence of God. But God is greater than what we face. Fear can be crushed with faith in God. Satan is no match for the God of the universe. God's Son, Jesus, reigns. Place your hope and keep your trust in the great and mighty God of all creation through Jesus Christ, His Son.

Fun By The Numbers

Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

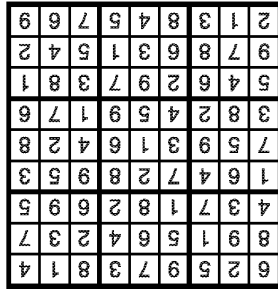

Here's How It Works:

Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

ASK THE MOTOR MEDICS®

Automotive Advice from the Under The Hood® Show

Dear Motor Medics,

I am the proud owner of a 1951 Chrysler with the straight six-cylinder engine. I recently inherited this car from my father in law who had the vehicle since it was new. This car has not had the oil changed on it for probably six or seven years. I plan on driving the car occasionally in the summer for parades and joy rides amounting to only a few hundred miles per year. How often should I change the oil and what type should I use?

Thank you,
Bernard from Tyler Texas

Dear Bernard,

It sounds like you are in for some fun times with your new toy. To keep the engine working smoothly, the proper oil type and changes will be very important. On my own vehicles of older vintage that see just a few hundred miles a year I like to change the oil in the fall and spring, just before storage and just after getting them out. I do this to keep the engines clean and to keep the moisture in the oil down. My biggest concern when changing oil is the type I use. ZDDP was an additive contained in oil until recently. If you run oil without it you can cause very premature wear and damage to the engine. Make sure you use ZDDP replacement additive or historic vehicle oil that meets the lubricity requirements that the older oils would have had, and use the factory recommended weight rating.

Take care,
the Motor Medics

Dear Motor Medics,

I hate check engine lights! Well, maybe not so much the light as what it represents...money. They should call it the check your bank account light because every time it comes on, I have to check my account to see if I can afford to turn the light off. My most recent experience involves several tries at a repair myself instead of a professional with no luck. The dash on my 2005 Deville said check gas cap so I checked it and cleared the code with one of those do it yourself readers then it came back on. Then I bought a new cap and it came on again. The code says small leak when I read it with my do it yourself scanner. What should I do next? I tried to save money but I'm no mechanic.

Thank you,
Dan in Sterling Illinois

Dear Dan,

Dan, I am a professional mechanic and I feel your pain. This is one of the engine codes that is best left to a shop. They sometimes pull their hair out on this one. By all means start with checking the cap and replace it if it's worn. That's what we do. Next, we use a special machine to smoke test the vent system for leaks and repair as needed. While smoke checking we are looking for external leaks from the tank and lines and also leaks past the vent valve and purge valves. Either one will cause the code.

Take care,
the Motor Medics

Dear Motor Medics,

I'm addicted to my seat heaters. Every car I have ever purchased has had them and it has even been a deal breaker for me when shopping for a car if it did not have them. I use my heaters year-round unless it is too warm out. My driver side seat heater just failed on my Cadillac and of course it is 2 months out of factory warranty. They would love to replace it for me at a charge of \$800.00 and that's just not going to happen. I am not ready to purchase a new car, but I want my seat heater to work. Is there anything I can do to get it going again?

Thank you,
Joe in Detroit Lakes Minnesota

Dear Joe,

I too enjoy my heated seats and when they fail, I would never think of spending \$800 just to keep my rear end warm. Good thing that there are alternatives out there. You could check with your local recycled parts place, AKA Salvage Yard, and they may have an entire working seat for you that will match your interior, or you could look into an aftermarket heater. Seat heaters are a great accessory for anyone who has a seat to sit on. Cars, trucks, tractors, they all can be equipped with heaters usually at a much lower price than a replacement factory unit. Check your local car stereo shops or accessory installation dealer to see if they offer them.

Take care,
the Motor Medics

Dear Motor Medics,

I had the air conditioning system fail on my Land cruiser two years ago due to a large leak in the rear refrigerant lines that run under the vehicle. Where the lines run, they are susceptible to damage from road debris and those concrete stops they put at the front of parking spaces. You know, the ones with the metal stakes holding them that my teenage daughter thinks is ok to drive over instead of backing up. So, after the cloud of refrigerant smoke cleared, I took it to both the dealer and an independent shop for a repair quote. Both places were over \$1000.00 to replace the lines. They said the lines come as a set and take many hours to replace. Is there anything I can do that won't cost me so much money?

Thank you,
Rich in Attica Indiana

Dear Rich,

Ouch! You have a few choices. You can do without air conditioning, you can spend the money for new lines, you could block off the rear lines and just use the front a/c, or you can repair the lines you have. There are a/c line repair kits out in the market that not all shops have but the ones that do will be able to cut out the damaged section and splice in a new one. You can also have a rear delete kit installed. Either one will be a large savings over having the entire line set replaced.

Take care,
the Motor Medics
