### MERCHANDISE

### MISCELLANEOUS

**PRAYER TO Holy Spirit**  
Holy Spirit, you who makes us see everything and shows us the way to reach our ideal. You who gives us the divine gift to forgive and forget the wrong that is done to us and who is in all instances of our lives with us. We, in this short dialogue, want to thank you for everything and confirm once more that we never want to be separated from you no matter how great the material desires may be. We want to be with you and our loved ones in your perpetual glory. Amen. Pray this for 3 consecutive days without stating one's wish. After third day, your wish will be granted no matter how difficult it may be. Promise to publish this as soon as your favor is granted.

## LOOK!

**~ Accustomed to Sin ~**  
I'm concerned about what Americans have gotten very accustomed to- and what is even more troubling is that the church people have also gotten caught up in this spiritual cancer. It is quickly eroding away the strong foundation that America was founded on and has relied on for many years. And even sadder is that so many who say they are Christians don't even recognize what they are doing.  
Hollywood has brought into society so much darkness in many forms, and most people and way too many church people have become used to the evil ways, the vulgar language, the sexual content and such unbiblical lifestyles- and say little to nothing against a dark agenda that opposes God at every corner.  
Common people- right along with church folks- listen to such ungodly lyrics in music, even paying to go to concerts in places like casinos where they have no business being, and yet we wonder why the American culture continues to decay and sin continues to grow in its influence in the lives of men and women of all ages.  
Way too many inside and outside the church have become too familiar and accustomed to sin. They've learned how to live with sin rather than oppose it to any real degree. So we have a continual mess that is causing far too many to slowly slip into being unresponsive spiritually, and so we sink into the mire we don't even realize we are in. America must have a spiritual awakening before it is too late.

# ASK THE MOTOR MEDICS®

*Automotive Advice from the Under The Hood® Show*

Dear Motor Medics,

Do diesel vehicles need fuel system cleanings? What are some good vehicles that I as a high school student could get under \$5,000? I would prefer a vehicle with a manual transmission. Do you have any suggestions for me?

Thank you,  
Keegan in Ainsworth Nebraska

Dear Keegan,

Diesel vehicles can benefit from fuel injection cleanings. We find when we clean diesel engines the fuel mileage improves. The dirtier the fuel injection system is, the better the improvement you can expect to see after a cleaning. Keeping deposits off the tips of injectors can also prevent early wear of the injectors and help extend the life of the pump.

As for a vehicle, you'll have to make that decision on your own based on what is available in your market for the price. Vehicles are hard to find lately with less to choose from. I would stay away from vehicles that are high performance such as supercharged engines or tuner cars that have been modified so you can get something more reliable. The performance cars are cool, but you can get a fast car that will need work and cost more in insurance, or a nice reliable car with more features and spend the same amount. Maybe even have some left over for the stereo. A very important pre-purchase item is to have a used car inspection performed by a knowledgeable mechanic before you buy the vehicle so that you don't end up with unforeseen expense.

Take care,  
the Motor Medics

Dear Motor Medics,

I have a 2003 GMC Pickup with 125,000 miles. Recently while driving it a light on the dash reads Reduced Engine Power with the check engine lamp on and the vehicle speed is limited to approximately 25 MPH. I had a diagnostic scan which returned a code of P1516, and they said everything they could find pointed to the throttle body actuator. Is it possible that the problem could be the throttle body being dirty and running cleaner through the gas tank will help? If the throttle body needs to be replaced, what should I expect the cost to be? P.S. this has happened about three times in the last 150 miles.

Thank you,  
Dwight in Worthing South Dakota

Dear Dwight,

GM light duty trucks now have this type of electric throttle system to control engine speed and cruise control. The system is a very sound one with several sensors to act as backups for the other so the system can tell if there is a failure and can shut it down or limit power for safety. The code you have tells me that the engine has seen a circuit failure in the throttle body. This means the throttle body sensors or the wiring to them may have failed. Cleaning will not help this one or have prevented the failure. You will need to have a shop use a lab scope to read the voltages to verify the problem. Check around for local pricing.

Take care,  
the Motor Medics

Dear Motor Medics,

I own a 2005 Chevrolet Impala that I bought used in March of 2006 with 8,000 miles. The vehicle now has 182,000 miles so it does not sit still very often. I have been having problems with the speedometer and other instrument cluster gauges not working correctly. Sometimes the speedometer will stick on 60 and not drop down until I shut off and restart the car. Is this a common problem with this type of vehicle and if so, how do I fix it?

Thank you,  
Doug in Minneapolis

Dear Doug,

We have repaired several of these, but many are still ticking with well over 200,000 miles on them. A general repair shop should be able to diagnose the issue and if they find that it is within the speedometer, they can replace the unit with a rebuilt unit that is available from most auto parts stores. The units come pre-programmed for easy installation. When they order the unit, it can take a couple of weeks or so as they need to send your vehicle information like mileage and identification number to the manufacturer of the unit so that they can enter it into the replacement. Once it arrives your shop can install the unit and they will have you sign a mileage affidavit stating that the mileage you gave them to enter the replacement was correct. They will then box up the old unit and send it back as a core.

Take care,  
the Motor Medics

Dear Motor Medics,

I have a 2005 Dodge Caravan SE that we bought used and it was not equipped with power windows, door locks, or power sliding doors. We would really like to add these features and keyless entry. Can this be done for a reasonable price and where do we go to get it done?

Thank you,  
Janet in Madison, Wisconsin

Dear Janet,

Power features have become standard on vehicles or at least it seems that way. More and more vehicles, especially ones that are used for hauling the family like a van seem to almost always have full power in them. It is a rarity for one to come into our shop that does not have at least power windows and locks, but they are out there. The cost of the accessories will be dependent on the shop and the quality. As for adding them to the front doors that should not be that big of an issue. Many companies offer aftermarket power windows and lock kits, and remotes can be added easily as well. The power sliding doors are another story and I have not seen anyone who makes an aftermarket unit for those but there may be out there. Power sliders can be very difficult to work on and I have fought with my share. Check around with local vehicle accessory shops that install cruise controls, air conditioning, remote starts, etc. These types of shops often install power accessories like this as well.

Take care,  
the Motor Medics
