Transportation/Drivers

~ Before You Take Off ~

There is so many things that will attempt to override God's will for your life. Sometimes this is of our own making because of your own preconceived ideas of what you think is important to be doing. Know that Satan himself is in the dirty work of distractions and trying to get you sidetracked from God's plan for yourself.

For those who will strive to make God's will their focus will find more peace and experience a fruitful and satisfying life. They will discover more calm in the storms they are faced with when you let God be in charge and keep Him there.

Before you start your day, why don't you ask the Lord these kinds of things? "I need to go to Walmart and get some items, but Lord, what can I do for you while I'm there?" "I need to stop and get some gas. Where's the best place you think I need to go and get it?" "Lord, I'm going out to eat lunch. Where is the best place you need me to have lunch today?"

There is no other way to fix this world of its problems and defeat sin than for God's people to have a spiritual heart change. Secular government and legislation can't fix our problems. They can never be overcome apart from the gospel being fully engaged in our society.

ASK THE MOTOR MEDICS[®]

Automotive Advice from the Under The Hood[®] Show

Dear Motor Medics,

What can I do about rust on my Suburban? I've had this 2003 Sub since new and it only has 90k miles on it but the body is starting to rust on the bottom of all of the doors which has now crept around to the front side of them and it also has a rust hole in the drivers and passenger side corners right at the rear bumper, other than that it is perfect inside and out. I just want it to look nice while I drive some more miles out of it but my local body shop is not excited about doing the repairs.

Thank you,

Milton In Elizabethtown Pennsylvania

Dear Milton,

Rust is primarily two kinds, surface and major. Surface rust is not as bad if you catch it and remove it early and protect the surface with good paint. Major rust on a car is like a cancer and it eats its way from the inside out and it is hard to stop. By the time you see the rust it has taken a secure foothold on the metal surrounding where you see it and has weakened the panel to the point of a hole. To remove it you need to perform major surgery and cut all of the rusted metal out and replace it then protect the area and repaint or it will return quickly. It is time consuming and expensive and many shops don't like to do it.

Take care,
the Motor Medics

Dear Motor Medics,

I'm thinking about repairing my seat heaters now dead eight years. Why now you ask? Well, I was listening to you guys on your Under The Hood radio show and you mentioned that there was a fix for some seat heaters in certain popular cars and I am ready to take on the challenge of trying to make the repairs myself. I'm wondering where I start and how difficult it may be.

Thank you,

Terry in Sioux Falls South Dakota

Dear Terry,

You will either have a great feeling of accomplishment when you are done with this job or a deep hatred of cars that will live on for generations to come in your family. Seriously though, it could go either way. You have to ask yourself, am I willing and able to remove my seats from my car and then remove the covers from them and put them back together. If you are comfortable with that then it's time to visit the local parts store and see if the heating elements for your vehicle are available as stock replacements. If they are then it's as simple as plugging them in once you have removed the seat covers and old elements. If they are not then you can go with aftermarket heaters you can get online or from a car accessory store locally. They then have to be wired but work well as an aftermarket alternative to the expensive factory installed units. Good luck!

Take care,
the Motor Medics

Dear Motor Medics,

My transmission failed while on vacation. The failures not the end of the world, I understand things break but most of the vacation was spent dealing with the truck. I use it to pull my camper and boat together and when it stopped so did the vacation. This 2008 ¾ ton GMC truck has 90,000 miles and I never changed the transmission fluid because when I bought it they said it's good to 100,000 miles. Is there anything I should've done to prevent the failure? They told me I needed a rebuild because it was burnt up.

Thank you,

Terry in Fargo, North Dakota

Dear Terry,

First, what is the recommended tow rating for the truck? Compare this to what you are towing and if you are exceeding it get a bigger truck or less of a load. Make sure you take into account your fully loaded setup with all fluids and your family included at the time you weigh it. Tow ratings should also not be at 100%, more like 80% to allow for headwinds and such. Over pulling is a number one failure cause but you can still have transmission failures even without towing. We recommend changing the fluid when towing every 30,000 miles or so and observing the condition of the fluid between changes. The fluid in this truck is meant for extended life but some circumstances will reduce that life. Also be sure the transmission cooler is the proper size.

Take care,
the Motor Medics

Dear Motor Medics,

I'm having starting issues with my 1991 Chevy full size truck. I have a 350 engine that was just rebuilt about 10,000 miles ago. When we performed the rebuild we also replaced the battery, alternator and battery cables. The starter was replaced about five years ago so we opted not to replace it at the same time. When the vehicle has been running for a couple hours and is shut off it will crank very slow and sometimes not start at all unless you let it sit until the engine cools off. The problem seems to be worse if I have driven it harder such as towing or highway use. What do you think is wrong and how can I fix it?

Thank you,

Ray in Pierre, South Dakota

Dear Ray,

It sounds like you have a starter that has failed. The first step is to verify there are no problems with your cables or battery by performing voltage drop checks on the cables and a capacitance test on the battery even though they are new. Once you know they are all good then check the current draw of the starter both hot and cold. If it is pulling too much current when hot you may have either bad bearings in the starter or a bad armature. Did you install headers when you did the rebuild? If so, there may be too much heat reaching the starter and it may need to be shielded.

Take care,
the Motor Medics

CLASSIFIED QUICK TIPS

Prepare. Know what is important to readers shopping in your classified category. **Make Your Copy Complete.** Use ad copy effectively to thoroughly communicate to potential buyer(s). Organize the ad carefully. Space and punctuate, so that the reader can follow the ad and understand its content.

Be Creative Descriptive. List major selling points (price, color, size, features or options).

Be Factual. Be Helpful. Include hours of operation, best days and times in which to make contact as well as area code on phone numbers.

Make Your Ad Easily Recognizable. Choose a main benefit of your merchandise and feature it in a headline. Use art, large type sizes, bolding and best of all, use white space to make your ad visually attractive and so powerful, it's jumping off the page.

Maximize The Amount Of Prospective Buyers/Readers. Multiply insertions help prospective buyers/readers REMEMBER the ad because of repetition. Take advantage of discounted rates available for multiple insertions.

Urge The Reader To Act Now! Every ad should include a strong bid for action. Stimulate prompt action by using such phrases as "Call Now", "Available Immediately" or "Won't Last".

The Big Nickel hopes these tips will help you, please call 417-624-4100 and our telephone sales representatives will be happy to assist you.

BRAIN GAMES

-CROSSWORD- PUZZLE

-JANUARY- WEEK 3

CRYPTO FUN

Determine the code to reveal the answer!

- Solve the code to discover words related to the library. Each number corresponds to a letter. (Hint: 13 = O)
- A. 4 9 19 9 14 13 23**
Clue: List or itemized display
 - B. 8 13 13 26 15**
Clue: Recorded written information
 - C. 13 11 23 9 22 18 10 20**
Clue: Sort
 - D. 15 3 20 14 25 20 15**
Clue: Racks

WORD SCRAMBLE

Rearrange the letters to spell something pertaining to the library.

OVEMUL

Answer: Volume

7			8			6
		8	5			3
3				2	1	
		1			7	6
				7		
			9			1
	2					
	9		7		2	5
			5	6	7	

Level: Advanced

Fun By The Numbers

Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

Here's How It Works:

Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!
