*all it takes!*

## WACKER NEUSON EZ50

- 44 HP Perkins Diesel / Cab with Heat & Air
- Hydraulic Thumb
- Joystick & Backhoe Controls
- 2 YR / 2000 HR Warranty

The EZ50 mini-excavator offers excellent lifting and digging power as well as quick work cycles. Using the newest technologies, the emissions of the mini-excavator were reduced and, at the same time, the efficiency increased. For example, the powerful engine in the EZ50 meets the stage 5 exhaust emission standards. In terms of operator-friendliness, the excavator is impressive. The intuitive operating concept and excellent view of the work area contribute to the easy and comfortable operation of the machine. The EZ50 is also a zero-tail excavator and is well suited for working in narrow spaces.

*~ Time Repeats Itself ~*

The Bible repeats itself. I'm trying to get the feel for where we are. Could we now be right on the edge of understanding what 2 Timothy speaks of about the difficult times that are to come? Or in the Gospel of John of what will happen in the last days? Or 1 Corinthians when the trumpet will sound? Or 1 Peter's instructions about the end days? Or the Book of Jude? How about in Genesis: Noah and the ark when God had to destroy the people of the world? Are we at Chapter 5 of the Book of Daniel- is the handwriting now on the wall? Are our days numbered and America is found wanting? We have entered Chapter 3 of the Book of Revelation, as the time of the Laodicean church where many of God's people have grown to being lukewarm, having little effect upon the society and the culture? How close are we now to the great catching away where born-again Christians will suddenly disappear from the face of the earth, throwing the rest of the world into utter chaos? There is no doubt we are now seeing the beginning of sorrows that Matthew 24 talks about, where it says that Christians will become hated because they stand with Christ. You had better make sure your life is right with God by being a true follower of Jesus Christ. Reach out to Jesus today, for He is our only hope.

**ASK THE MOTOR MEDICS**

Automotive Advice from the Under The Hood Show

Dear Motor Medics,  
My name is Clarence I live in Entiat WA, and I listen to your Under The Hood show on podcast. I am rebuilding a 2.0 Liter engine out of a 1976 VW bus. This engine is a solid lifter engine and I've heard I need to use a Zink additive to protect the engine but is there anything other than good oil that will help extend the life of my rebuild? It's an air-cooled engine so it does run a little hotter than your normal car engine. Thanks for the show, I enjoy it very much. I recently found it on radio and I'm 1/2 way through the archived podcasts and look forward to my drive to work every day to be able to listen to the show.  
Thank you,  
Clarence in Entiat Washington

Dear Clarence,  
Those old VW engines were fun to work on. We still get a fair amount of email and calls about them. You are right on track with the zinc additive or the ZDDP replacement additive. All engines can benefit from the high-pressure wear protection that the ZDDP additive provides but in the case of older engines without roller camshafts like the ones found in this VW and older hot rods and collector cars it is a must or parts like the camshaft will wear quickly and can destroy the engine. The additive found at parts stores and a good quality oil should help it to last.  
Take care,  
the Motor Medics

Dear Motor Medics,  
Hello gents. I've been listening to your Under The Hood radio show podcast down here in Australia for a few months now and figured I've got nothing to lose by contacting you. I have a 1997 BMW E36 323i with 172,000km. My problem is I have no hot air from the heater. Only ambient temperature or ice-cold air conditioning. Can you help me? It gets mighty cold down here. Thanks heaps guys!  
Thank you,  
Jason in Werribee Victoria Australia

Dear Jason,  
Thanks for listening down there! For some reason we here in the states don't always think about how cold it gets in Australia but we're sure you do with no heat. Even though you have a BMW, and the steering wheel is on the other side of the dash, the problem you have is relative to all cars. You need to have hot water running through the heater core and air directed through it without bypassing so that it warms the interior. Our first step is to verify the engine thermostat keeps the engine at proper temp and if not, you must fix that first. Second, make sure the air door opens and closes in the dash. This can take a little you tube research to find and check. Third, the core needs to be clean. You can try to flush it with a garden hose both directions several times and if that helps, it indicates you have a restricted core.  
Take care,  
the Motor Medics
