### Here's How It Works:

Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the puzzle. The more numbers you name, the easier it gets to solve the boxes!

*~ At a Rapid Pace ~*

This world is changing at a rapid pace and I wish I could say that it's basically for the good. But I think you know better. Only 20% of Americans now attend church faithfully- and going only 2 times per month is considered faithful.

Yet 70% of Americans say they are a Christian. Statistics say that of the 20%, only 10% are considered to truly be born again Christians and only 8% have a Biblical worldview that the Bible is accurately true. But only 1% ever shares the gospel message with another person.

Another new poll shows that 45% of Americans believe that if all religion was removed from America, this nation would be better off, that society could function better. We are told today that most media outlets (not all but many) report a lie or a half-truth 10 times faster than the actual truth. In other words, a person is apt to hear a half-truth or lie about a matter 10 times before the truth is told about a matter.

There are great moves and advances in the gospel. But it has been mainly in those places where Christians are being persecuted for their faith as Christians. We are living now on borrowed time. With the time we have left, Christians need to do the most they can for God's kingdom.

**ASK THE MOTORMEDICS**  
*Automotive Advice from the Under The Hood Show*

Dear Motor Medics,  
There's smoke coming from near my steering wheel at times right out of the column. It's not a lot of smoke but I can see it and smell it and it scares me. All my vehicle systems seem to be working fine now but a few months ago my turn signals were acting up. The car is a 2001 Buick Regal. Is this something I should be concerned about or can I let it go?

Thank you,  
Robert in Sheldon Iowa

Dear Robert,  
Your car is smoking... There is no way we would let that go without a thorough check out for safety. Without seeing the car hands-on it's hard to say but we have seen smoke generated in this way due to failing turn signal switches. The switch can fail simply because it is old or it can be stressed by things like shorted wiring, failed bulbs or adding an extra load to the system such as a trailer which has an added load of extra lighting that has to be carried by the cars wiring. The first step will be verifying where the smoke is coming from. That will require someone experienced with the system to open it up and inspect the parts. If any parts are found to be burnt they will need to be repaired then the rest of the effected system will need to be diagnosed to make sure that what caused the first failure does not happen again.

Take care,  
the Motor Medics

Dear Motor Medics,  
I listen to your Under The Hood radio show here in Branson almost every week and you guys have some of the most useful car advice I have ever found, and it's free which is the best kind in my book. I read your column each week too and a while back you had talked about readers car that had a fueling issue. When the car was being filled with gasoline it would not fill quickly, it would fill for a few seconds then click off the pump and it would do this over and over again. My 2008 Impala is doing this now. What was it and could it be the same thing with my car?

Thank you,  
Doug in Branson Missouri

Dear Doug,  
It is common on many cars especially GM cars and trucks to have this happen and it is often caused by a failure in what is called the evaporative emissions system. The fuel system is a closed system which prevents fuel from evaporating into the atmosphere which would cause pollution and also be a waste of your money as your fuel would simply disappear over time. The system does need to vent at times for things like filling the tank and also when fuel is being consumed by the engine or it would back up like yours does. Also, in the case of the engine using fuel the tank would eventually collapse. This is just one possible problem.

Take care,  
the Motor Medics

# CLASSIFIED QUICK TIPS WRITING A SUCCESSFUL AD

**Prepare.** Know what is important to readers shopping in your classified category.

**Make Your Copy Complete.**

Use ad copy effectively to thoroughly communicate to potential buyer(s). Organize the ad carefully. Space and punctuate, so that the reader can follow the ad and understand its content.

**Be Creative Descriptive.**

List major selling points (price, color, size, features or options).

**Be Factual. Be Helpful.**

Include hours of operation, best days and times in which to make contact as well as area code on phone numbers.

**Make Your Ad Easily Recognizable.**
