BIG NICKEL BRAIN GAMES

-CROSSWORD- PUZZLE - JULY - WEEK 1

CRYPTO FUN

Determine the code to reveal the answer!

- Solve the code to discover words related to Independence Day. Each number corresponds to a letter. (Hint: 14 = E)
- A. 10 26 11 14 3 14 26 11 14 26 19 14
Clue: Freedom from control
 - B. 13 10 24 14 7 5 24 15 8
Clue: Pyrotechnics
 - C. 19 14 17 14 2 24 25 23 10 5 26
Clue: Party
 - D. 20 10 19 23 5 24 1
Clue: Defeating an opponent

WORD SCRAMBLE

Rearrange the letters to spell something pertaining to Fourth of July.

IRLSGL

Answer: Grills

Fun By The Numbers

Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

Here's How It Works:

Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

-PUZZLE- SODOKU - JULY - WEEK 1

~ The Great Day ~
 Jesus said in John 12:48, "He who rejects Me, and does not receive My words, has that which judges him - the word that I have spoken will judge him in the last day."
 The early Christians were accused of being radicals because they were so forceful in their witnessing. Why? Because they believed Jesus was coming back at any moment.
 The next great scheduled event on heaven's calendar is the disappearance of the born-again believers from the earth. It will be here sooner than most people imagine. The signs of the times are clearer than ever, that the great day of seeing the disappearance of millions of Christ's followers is at hand.
 But it is also going to see the leaving behind of more than are going. Don't procrastinate with anything you could now be doing for the Lord. Live each and every day with the expectancy that this could be it. Ask, "What is my assignment, Lord Jesus?"
 It ought to be evident to you that there are great changes taking place in the culture; changes that are bringing this world into places that are dark. God will shine His light into that darkness. You must pay attention before it is too late. Make your life right with God. Jesus is the only way, and God's word the only manual to follow.

ASK THE MOTOR MEDICS®

Automotive Advice from the Under The Hood® Show

Dear Motor Medics,

I have a 2004 GMC Yukon and I'm having a 4x4 problem. The system will work one time then not the next. When I take it to the shop it seems to be the time that it is working correctly. The problem it has is when I switch to 4x4 high the light just blinks then it stays in the 2wd position. Sometimes when I switch to low 4x4 then back to high it will work just fine until I put it back in the 2wd position.

Thank you,
Jack in Charleston West Virginia

Dear Jack,

Problems with systems that seem to always work when you have it in the shop are as big a pain for the mechanics as it is for you as the driver. The systems have computers that can often give codes which can help with the diagnostics, but they don't always indicate the exact cause and without the system actually failed at the moment it's being inspected makes it hard to diagnose and confirm repairs. The most often found issue we see when a 4x4 system in a GM truck of your model year fails like this is a failed shift motor or shift module. Both parts can be expensive so if you can get it to happen while at a shop so they can give a 100% accurate diagnosis it will go a long way to helping you save money and get it repaired right on the first visit.

Take care,
the Motor Medics

Dear Motor Medics,

I'm a long time Under the Hood listener and I want to thank you for the great advice you guys give. I have a problem with my headlights. I drive a 2007 Chevy Impala and when I'm driving my headlights sometimes just shut off by themselves. If I pull the headlight switch out, they stay off but switching to the high beams does work but only for about two minutes then they start to blink and fail too. I tried a switch that I installed myself and it did not help.

Thank you,
Steven in Lindsay Oklahoma

Dear Steven,

We have experienced headlight failure ourselves and it can be a scary thing. At least you have high beams so you can get off the road safely. This is actually becoming a common issue on this body style car. The headlight switches do fail quite often and your replacing of the switch may have been needed as well as the further repairs needed now. The switch connector needs to be checked during the installation of the switch. The pins in the connector tend to become burnt and fail due to high resistance and heat build-up. Make sure the pins are clean and in good shape and are not loose and replace any that are questionable. The pins can be found at a GM dealership parts department and the tool to install them at most auto parts stores. Also check your headlight socket connections.

Take care,
the Motor Medics

Dear Motor Medics,

I have a 2015 Dodge grand Caravan and the power operated side door doesn't always work. Sometimes when you close the door it will almost move to the full closed position then it reverses and fully opens. If I try it several times it sometimes closes. I have been told by two dealerships that it needs a new ribbon cable and its hundreds of dollars. Is this common?

Thank you,
Margaret in Fargo North Dakota

Dear Margaret,

This is a common problem in many of the vans using a power sliding door system. They have to make a connection between the door and the body and many do it with a cable. The cable moves back and forth every time the door slides and with enough time it can be rubbed through or break one of the wires in the cable. If either of these things happens it can act just like yours is operating. Other issues like programming can be a factor and less expensive than a new cable so make sure that they give it a proper diagnosis and guarantee their work. A good thing to remember is the most expensive repair is always the one you don't need. Make sure that the shop doing the repairs has had experience with the system used on your vehicle. If it is a cable they are expensive to replace mostly due to the time involved for the labor which can take several hours of work.

Take care,
the Motor Medics

Dear Motor Medics,

I listen to Under the Hood Here in Salida Colorado and I drive a Chevy S10 with a manual transmission. Recently the transmission has become hard to put into reverse and also first gear unless the engine is turned off. When I try to engage it the gears grind and if I force it I can get it to go eventually. Once it is in gear it seems to work ok. What can you tell me?

Thank you,
Kelly in Salida Colorado

Dear Kelly,

It sounds like the clutch is not completely disengaging. To smoothly engage without gear clash, the input shaft of the transmission needs to stop moving and this occurs when the clutch is pressed down. Many things can cause it to keep moving like a warped clutch disc or pressure plate or the pilot shaft dragging on the crankshaft but the most common item is worn clutch hydraulics. The vehicle will need to be properly diagnosed to verify which component is the cause before repairs. The one thing to note is that if that if it is being operated in this condition it can cause damage to occur to the transmission very quickly and increase repair costs. The grinding can cause gear wear internally and if the clutch is dragging due to a hydraulic problem then heat will be built up which can burn up clutch friction parts or cause warpage which will mean having to replace the clutch parts.

Take care,
the Motor Medics

FOR ENTERTAINMENT ONLY • Always consult your local shop and follow all safety procedures before repairs.
