Determine the code to reveal the answer!

- Solve the code to discover words related to immunizations. Each number corresponds to a letter. (Hint: 18 = E)
- A. 14 12 11 11 25 15 18**
Clue: Protects against illness
 - B. 10 19 11 23 19 9**
Clue: Medical professional
 - C. 15 18 18 10 3 18**
Clue: Pointy instrument
 - D. 16 9 19 23 18 11 23 25 19 15**
Clue: Provides safeguards

WORD SCRAMBLE

Rearrange the letters to spell something pertaining to immunizations.

JITCNE

Answer: Infect

Fun By The Numbers

Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

Here's How It Works:
Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

CLASSIFIED QUICK TIPS WRITING A SUCCESSFUL AD

Prepare. Know what is important to readers shopping in your classified category.

Make Your Copy Complete.

Use ad copy effectively to thoroughly communicate to potential buyer(s).

Organize the ad carefully. Space and punctuate, so that the reader can follow the ad and understand its content.

Be Creative Descriptive.

List major selling points (price, color, size, features or options).

Be Factual. Be Helpful.

Include hours of operation, best days and times in which to make contact as well as area code on phone numbers.

Make Your Ad Easily Recognizable.

Choose a main benefit of your merchandise and feature it in a headline. Use art, large type sizes, bolding and best of all, use white space to make your ad visually attractive and so powerful, it's jumping off the page.

Maximize The Amount Of Prospective Buyers/Readers. Multiply insertions help prospective buyers/readers REMEMBER the ad because of repetition. Take advantage of discounted rates available for multiple insertions.

Urge The Reader To Act Now!

Every ad should include a strong bid for action. Stimulate prompt action by using such phrases as "Call Now", "Available Immediately" or "Won't Last".

The Big Nickel hopes these tips will help you, please call 417-624-4100 and our telephone sales representatives will be happy to assist you.

~ What Stands the Test? ~
 We have the same amount of it, but what we choose to do with time will affect our lives more and more. God gives us time at no charge; it is free. Time is a most vital resource. Money can be replaced, possessions restored and events rescheduled. But not time. What you can do now, you may not be able to do tomorrow. What you have today may be gone as well.
 Time is of great value, and the wise Christian makes the most of it. Wise are those that know how to make the most of time by allowing God to set their watch and schedule. If you don't, your flesh will, and the devil will make sure you have no time for the things of God. There are so many people who wish they had done more important things with their time.
 Psalm 89:47-48; says, "Remember how short my time is. What man can live and not see death?" There will come a day when we all will have to give an account of the decisions we made during our time here on earth. The Bible reminds every person that they do not know the time or moment when their life will be over or when Jesus will return. You don't know the day or the hour when you'll have no more time. Are you satisfied with what you've done, as of now, if you have to stand before Christ Jesus tomorrow and give an account of your time?

ASK THE MOTOR MEDICS®

Automotive Advice from the Under The Hood® Show

Dear Motor Medics,

I used the remote start on my 2004 Chevy Silverado to warm it up the other morning and came out to find my interior filled with smoke. I did not see smoke coming out of any area, so I aired it out and drove to work. I have checked all the electrical functions and the only thing I find that does not work is the heater fan high speed. Could this be what was smoking?

Thank you,
Steven in Kalamazoo Michigan

Dear Steven,

The interior HVAC blower fan system could have been the source of the smoke. Blower resistor failures are common as vehicles age. The blower windings break down over time and the resistance on the circuit increases, this extra resistance causes the resistor to run much hotter than it should. Eventually the resistor can fail and sometimes it will let off smoke. In addition to the resistor failing some vehicles have issues with the wires that attach to the resistor and the connector plug melting. In the case of the Silverado, it is a common issue and some of them were subject to a recall so check with your local dealership for more information. Most important of all to remember is to stop driving a vehicle when you see or smell smoke. Fire spreads quickly in a vehicle and you can be overcome by the fumes of the many materials used in its construction. Always think about your safety first.

Take care,
the Motor Medics

Dear Motor Medics,

I have a 2007 Chevy Impala with several issues that all occurred about the same time. I have a check engine light on, I have poor cabin heat, and my fuel mileage is not as good as it used to be. What kind of things should I be looking for?

Thank you,
Diane in Wray Colorado

Dear Diane,

It is possible that just one thing is causing all your problems and that item is small and relatively inexpensive, your engine's thermostat. The thermostat is responsible for keeping the engine temperature at a steady level so that you have proper heat available for the interior and proper operating temperature for the engine to operate efficiently. When a thermostat does not allow the engine to warm to a certain level on OBDII vehicles the computer responds by turning on the check engine light. Another effect of low temps is a decrease in fuel mileage due to continued fuel mixture enrichment. In the past, our vehicles used carburetors with chokes on them to enrich the fuel mixture for proper running until the engine was warm. Around the early eighties this changed to electronic fuel injection and is now controlled by the engine computer. If the thermostat does not regulate the engine temperature properly the computer may continue to enrich the fuel mixture causing the vehicle to have poor mileage. Thermostats should be serviced when the coolant is flushed or when they fail to operate as designed.

Take care,
the Motor Medics

Dear Motor Medics,

I have been having issues with my vehicle for several months with a warning light for both ABS and Trac on my dash. Both the red and the amber lights are on and when they come on the message "service stability" also appears in the message center. My vehicle is a 2014 Chevy Tahoe with only 60,000 miles. I took it to a shop that tells me the module has failed and that a replacement unit installed will be well over \$2000.00 which I do not want to spend on a ten-year-old vehicle but want it fixed. Are there any alternatives for repair if the module has failed?

Thank you,
Danita in Carroll Iowa

Dear Danita,

This is a common problem with many vehicles due to normal wear and age. Flushing the brake system on a regular basis is a good preventive measure but once the system fails the only fix is often replacement or rebuilding. A certified used part is a good choice saving hundreds of dollars but due to the popularity often hard to find. The other money saving choice is rebuilding. Ask your local shop if they sell rebuilt or check a certified auto recycler as they often carry such parts. Either used or rebuilt offer a significant cost savings over new and often carry a very similar if not better warranty. Once you have the repair made make sure you follow a regular maintenance schedule for long life.

Take care,
the Motor Medics

Dear Motor Medics,

I have a couple questions about ethanol fuels. My mileage changes when I use 10% ethanol instead of no ethanol, MPG going up when I use it. Not much but I see one or two MPG. How can this be when ethanol should be burning faster with less BTU? I also want to know if there is an additive, I should be using in my fuel system with the ethanol to prevent corrosion of the system. I have been using ethanol for over twenty years with no issue but don't want to have them in the future.

Thank you,
Barry in Rock Valley Iowa

Dear Barry,

Many people notice a change in mileage when they switch from ethanol to what most places call no ethanol blends. You would think that you would get better mileage with no ethanol gasoline but it's not always the case. Some cars get a little better mileage due to the increased octane of the fuel increasing performance. Too much of a fuel octane rating does nothing but if you use a lower than recommended octane in your vehicle the performance and mileage suffers, and you will see it every time you refuel. Cars have knock sensors to adjust for octane. As for additives in the tank when using ethanol, we have never seen any damage from using ethanol in proper recommended amounts in your tank. There is much more information online about both these subjects to help you out.

Take care,
the Motor Medics
