Fun By The Numbers

Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

Here's How It Works:

Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

~ Authority ~

Some people have more authority than others. We all have some level of it; some don't want it, and others will fight for it. Authority is essential for there to be order. You could also say real authority shows respect when it is used properly. Some think they have it when they really don't. Some take it by force. Others work for it.

Why is authority such a big deal? Because many times, it is power, and people want it just like they want riches. But many forget there is a price, and that price can become very high. Every position held in life will have to be answered one day before Christ- who has been appointed by His Father God as the judge over mankind.

I'm surprised at how people from political to social positions work to have authority and not take the seriousness of its outcome. At the end of their lives, nobody is going to be able to get away with anything or avoid judgement on how they conducted their life, and those who have been in authority will be held at a higher level of accountability. I will, as well as many others. And the greater the position, the greater the outcome.

This is serious, yet so few take it seriously in leadership, acting like they never will have to answer for how they used authority.

ASK THE MOTOR MEDICS®

Automotive Advice from the Under The Hood® Show

Dear Motor Medics,

I'm addicted to my seat heaters. Every car I have ever purchased has had them and it has even been a deal breaker for me when shopping for a car if it did not have them. I use my heaters year-round unless it is really warm out. My driver's side seat heater just failed on my Cadillac and of course it is 2 months out of factory warranty. They would love to replace it for me at a charge of \$800.00 and that's just not going to happen. I am not ready to purchase a new car, but I want my seat heater to work. Is there anything I can do to get it going again?

Thank you,
Sherri in Norfolk Nebraska

Dear Sherri,

I too enjoy my heated seats and when they fail, I would never think of spending \$800 just to keep my rear end warm. Good thing that there are alternatives out there. You could check with your local recycled parts place, AKA Salvage Yard, and they may have an entire working seat for you that will match your interior, or you could look into an aftermarket heater. Seat heaters are a great accessory for anyone who has a seat to sit on. Cars, trucks, tractors, they all can be equipped with heaters usually at a much lower price than a replacement factory unit. Check your local car stereo shops or accessory installation dealer to see if they offer them.

Take care,
the Motor Medics

Dear Motor Medics,

I had the air conditioning system fail on my Land cruiser two years ago due to a large leak in the rear refrigerant lines that run under the vehicle. Where the lines run, they are susceptible to damage from road debris and those concrete stops they put at the front of parking spaces. You know, the ones with the metal stakes holding them that my teenage daughter thinks are ok to drive over instead of backing up. So, after the cloud of refrigerant smoke cleared, I took it to both the dealer and an independent shop for a repair quote. Both places were over \$1000.00 to replace the lines. They said the lines come as a set and take many hours to replace. Is there anything I can do that won't cost me so much money?

Thank you,
Tom in Mayville North Dakota

Dear Tom,

Ouch! You have a few choices. You can do without air, you can spend the money on new lines, you could block off the rear lines and just use the front a/c, or you can repair the lines you have. There are a/c line repair kits out in the market that not all shops have but the ones that do will be able to cut out the damaged section and splice in a new one. You can also have a rear delete kit installed. Either one will be a large savings over having the entire line set replaced.

Take care,
the Motor Medics

Dear Motor Medics,

I've got a Nissan Titan and it has a ticking noise in the engine. It has had this for about a year and it doesn't seem to get any louder, but it makes me nervous about taking it on trips far from home. When I have my engine oil changed my shop says it's just lifters and they probably are noisy because I tend to change my engine oil every 10k miles, I know, that's too long between changes. I recently put in an additive that cleans the engine oil system and the noise stopped for two weeks then came back. Should I try two cans at the same time?

Thank you,
Carry in Hills Minnesota

Dear Carry,

NO! That's the best way we can answer that last question. Never use an additive in a way not directed by the manufacturer of said product or you risk permanent damage. Additives have their place and if used as directed sometimes can fix a problem and save you a ton of money, but they are also some of the most abused products out there. With your extended oil changes, you probably clogged up some oil passages and using the cleaner helped restore them. Most of those cleaners are meant to be installed, then the engine oil changed within a few minutes of running. If that works then you may be able to repeat every 1000k miles for a few months and you may save the engine.

Take care,
the Motor Medics

Dear Motor Medics,

Hey, what gives with the low tire pressure monitors? I am so sick of these things. It seems like every vehicle I drive has a low tire light on and even when I add the correct amount of air the light still stays on. How do these things work and how can I shut the light off permanently so that I don't have to worry about it.

Thank you,
Derik in Osage Beach Missouri

Dear Derik,

Yikes! It's never any fun having a light come on and taunt you like that. Check Engine lights, ABS lights and Low Tire lights are some of the most annoying things on a car, but they all are there for a reason. They either are trying to save your life or the car's life. In the case of a low tire light, it is the former. Low tire warning systems were made mandatory by the government for safety a while back due to so many accidents caused by tire failure from under inflation. The system uses pressure sensors mounted in the tire usually on the valve stem and they contain batteries and a transmitter to relay the pressure and tire temp to the vehicles computer where it determines if it is a safe pressure and either illuminates the warning lamp or not. The system can't be bypassed, and it would not be legal to do so. Get it diagnosed. Most shops can repair them at a reasonable price.

Take care,
the Motor Medics

CLASSIFIED QUICK TIPS

Prepare. Know what is important to readers shopping in your classified category.

Make Your Copy Complete. Use ad copy effectively to thoroughly communicate to potential buyer(s). Organize the ad carefully. Space and punctuate, so that the reader can fol- low the ad and understand its con- tent.

Be Creative Descriptive. List major selling points (price, color, size, features or options).

Be Factual. Be Helpful. Include hours of operation, best days and times in which to make contact as well as area code on phone numbers.

Make Your Ad Easily Recognizable. Choose a main benefit of your merchan- dise and feature it in a headline. Use art, large type sizes, bolding and best of all, use white space to make your ad visually attractive and so powerful, it's jumping off the page.

Maximize The Amount Of Prospective Buyers/Readers. Multiply insertions help prospective buyers/readers REMEMBER the ad because of repeti- tion. Take advantage of discounted rates available for multiple insertions.

Urge The Reader To Act Now! Every ad should include a strong bid for action. Stimulate prompt action by using such phrases as "Call Now", "Available Immediately" or "Won't Last".

The Big Nickel hopes these tips will help you, please call 417-624-4100 and our telephone sales representatives will be happy to assist you.
