Fun By The Numbers
Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

Here's How It Works:
Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

~ Little to Say ~

With all the unrest and growing sinful behavior going on with the world- in such a dangerous spiritual state of affairs- as many people perish each day into an eternal hell- with the great vanishing of the Christian population so near that any moment the true followers of Christ Jesus would be gone, leaving a world to fall into absolute chaos- why is it that still there are pulpits of America that say little to nothing of what sin is? Why are the signs of the day being ignored as they speak of the catching away of the saints and judgments of God fall as the final book of Revelation comes into play?

Still, there are only a few that will take the Word of God and address the real issues that are causing such a great falling away in this day of such deception and spiritual deadness of souls.

The greatest of all disasters the people of this world will ever experience is not that the wicked refuse to repent, but rather the lost good people that though they were right with God but missed heaven and followed the wicked into hell.

MOTORMEDICS[®]**

Automotive Advice from the Under The Hood[®] Show

Dear Motor Medics,

I'm thinking about purchasing a "green" vehicle, either a Hybrid or totally electric design but I don't know where to begin. I'll be using this as a second car but hope to use it as much as possible and I will likely purchase one that is new or less than a year old. Can you help me understand some of the differences between the two and give me ideas on what to consider?

Thank you,
Gary in Lincoln, Nebraska

Dear Gary,

The first thing to consider when purchasing either one is how it will be used. As a second car you have the luxury of using your other car for long trips. With the Hybrid this would not be a problem but with a fully electric car this would be a showstopper. Hybrid Vehicles all have an internal combustion engine combined with an electric motor that shares the load in part to save fuel while Electric Vehicles must be recharged when exhausted. If the Hybrid runs low on electricity it can rely on the engine, which if low on fuel can easily be refilled at the gas station. If you run out of juice on the Electric Vehicle it means a tow. Before purchasing either model we suggest you spend considerable time researching both options. There are many people who swear by their "green" vehicles and would never go back to a conventional car, others swear at them. Research is crucial.

Take care,
the Motor Medics

Dear Motor Medics,

My Dodge Caravan is five years old, and I just don't seem to be able to see the road like I used to. The lenses are still clear, and I've had them adjusted but I don't see well at all. We also have a Cadillac that has those tiny round headlights, and I can see great while driving it. Is there anything I can do to my van to get the same light out of it that the car has? I see cars with those bright lights that blind me when I drive. Can those be legal? I don't want to blind people, I just want to see well.

Thank you,
Glenna in Illinois

Dear Glenna,

There is a major difference in lighting systems between your two vehicles. The van uses headlight technology that has been used since the Model T; it has been refined a bit with better reflectors and bulbs but still has limits. The Cadillac uses H.I.D lamps. High intensity discharge comprised of special ballasts and bulbs, and a focusing projector lens to send the high-power light to the road immediately in front of you and not into oncoming vehicles eyes. You can upgrade to a better conventional bulb in the van but legally you can't use H.I.D bulbs without the projector type lens because it will blind other drivers. Aftermarket projector lenses are available for some vehicles but not the van as far as we know.

Take care,
the Motor Medics
