BIG NICKEL BRAIN GAMES

-CROSSWORD- PUZZLE - JULY - WEEK 1

CRYPTO FUN

Determine the code to reveal the answer!

- Solve the code to discover words related to swimming pools. Each number corresponds to a letter. (Hint: 23 = E)
- A. 20 10 1 23 19**
Clue: Wet stuff
 - B. 11 3 6 15 19 13 9 23**
Clue: Pool chemical
 - C. 6 10 7 7 23 19**
Clue: Climbing device
 - D. 17 20 13 26 17**
Clue: Moves through water

Fun By The Numbers

Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

9			7					8
				9				5
7	1	5		8				
8				1				9
	3				4			
	4	1	2	7				3
					2			
				5			4	6
						5		

Level: Intermediate

Here's How It Works:
Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

~ Playing with God ~

This is very common with some people who retain the belief that God just kind of goes along with our lives as we live them out. That many of us can pretty much choose our own life styles. That is, if we don't really do anything "too bad."

People play with God all the time. They treat God just as some friend they can call upon when they need a favor of some kind. They have the idea that God doesn't mind too much how they dress or the words they use, or the areas of the flesh they like to indulge in.

Lots of people never consider God's feelings as much as they do their own. Most are convinced that God's good with how they do much of their lives; and for the rest, He's maybe not completely happy with but will always forgive them.

This is such a dangerous way to do life when a person has a fleshly view of God apart from the real, holy and reverent view that God's word actually demands and requires for eternal life with Him.

CLASSIFIED QUICK TIPS

Prepare. Know what is important to readers shopping in your classified category. **Make Your Copy Complete.**

Use ad copy effectively to thoroughly communicate to potential buyer(s). Organize the ad carefully. Space and punctuate, so that the reader can follow the ad and understand its content.

Be Creative Descriptive. List major selling points (price, color, size, features or options).

Be Factual. Be Helpful. Include hours of operation, best days and times in which to make contact as well as area code on phone numbers.

Make Your Ad Easily Recognizable. Choose a main benefit of your merchandise and feature it in a headline.

Use art, large type sizes, bolding and best of all, use white space to make your ad visually attractive and so powerful, it's jumping off the page.

Maximize The Amount Of Prospective Buyers/Readers. Multiply insertions help prospective buyers/readers

REMEMBER the ad because of repetition. Take advantage of discounted rates available for multiple insertions.

Urge The Reader To Act Now! Every ad should include a strong bid for action.

Stimulate prompt action by using such phrases as "Call Now", "Available Immediately" or "Won't Last".

The Big Nickel hopes these tips will help you, please call 417-624-4100 and our telephone sales representatives will be happy to assist you.

ASK THE MOTOR MEDICS®

Automotive Advice from the Under The Hood® Show

Dear Motor Medics,

I've been having issues with my 2008 GMC Acadia. The Service Engine Soon light comes on and the Trac-Off and ABS lights come on and when they do the message center displays reduced power and I can't drive because I have no throttle response. When I take this thing into my shop it works for them because it only happens about once a week.

Thank you,
Mike in Daytona Florida

Dear Mike,

That's a ton of stuff going on there, but I suspect they might all be connected. Over the past year we have seen no less than 20 vehicles exhibit this set of symptoms and they all turned out to be the same, a failed throttle body. The throttle body is electric and is the part that regulates how much air enters the engine. There is no cable connecting the throttle pedal to the engine as in the past. This system, as you can imagine, must be calibrated exactly and have sensors to make sure that the vehicle does not have unintended acceleration or throttle loss. When the engine computer senses a failure in any of the internal circuits the system goes into reduced engine power mode. It will need to be diagnosed to know for sure and if replaced make sure you keep a receipt for the work in case GM decides to recall it for safety reasons which could possibly make you eligible for a monetary reimbursement on repairs.

Take care,
the Motor Medics

Dear Motor Medics,

I have a 2008 Chevy Impala and when it's cold outside I get a message on the dash that reads "Engine Hot A/C off and the Check Engine light comes on at the same time. Once the car warms up, I can shut the light off and clear the message if I cycle the ignition key. It has been doing this for over a year and my wife is getting nervous about it, so I want to get it fixed.

Thank you,
Tom in Ventura California

Dear Tom,

We have seen this message a few times and although engine codes and messages should be something simple to diagnose, they don't always get diagnosed as easily as you could hope for. The system needs to be diagnosed to know for sure what's up but some of the things to check that can trip the codes are the lack of ability to read engine temperature due to a failed sensor or connection to it or an actual failure of the engine to reach proper operating temperature in a preset amount of time as determined by the engine computer software. Now the message reads Engine Hot, but that's where it gets tricky because when the engine can't reach proper temperature it's often a failed thermostat and that makes the engine run cold, not hot. A strange situation for sure but it's just one of the fun things we mechanics get to deal with every day in our shops.

Take care,
the Motor Medics

Dear Motor Medics,

I have a 2021 Ram 1500 with a V6 engine that has a ongoing coolant leak. The leak is small and coming from the thermostat housing area. I have had the truck repair several times with both the thermostat, water pump, and then thermostat housing being replaced. The leak consumes about a pint of coolant a month. Can I use one of those cooling system sealers to fix it? I don't want to clog up the system trying to stop a leak. If I use it, how long does it last?

Thank you,
Gary in Litchfield Minnesota

Dear Gary,

We have seen this leak on multiple ram trucks in the past few years. There have been upgraded thermostat housings and thermostat covers which should fix this issue but in the colder climates we have seen multiple repeat failures. If it is still under warranty take it back to the shop that serviced it. If it is out of warranty, or you performed the work yourself and are tired of trying to seal up that small remaining leak then a sealer may be the ticket. We have had great success with a permanent leak sealer called KSeal. KSeal does not clog the system and is meant to be a permanent repair that you add to the system and leave in. Don't use it with other sealers and don't flush it out. Follow directions and if you have the results that we have seen it should stop the leak.

Take care,
the Motor Medics

Dear Motor Medics,

I'm rolling in my 2019 Toyota Corolla with custom aftermarket wheels and tires and custom vehicle wrap. Can you picture it? This thing is hot! Well, as hot as a Corolla can get. This is what I could afford as a new car when I purchased it right out of college, but it beats huge payments and I like it a lot. I have been having tire Pressure Monitor issues and the tire stores say its my car. The issue started a year after the new wheels and tires were installed and they have replaced all the sensors and can't get the system to work. Do you have any ideas?

Thank you,
Kenedy in Omaha Nebraska

Dear Kenedy,

Another Corolla with TPMS issues. This does not surprise us much. Usually, tire pressure monitor issues are a straight-forward repair. We scan the system to see which tire does not communicate with the receiver or which one is showing a fault then replace that sensor in the tire with a new one, program it, and its good to go. With the Toyotas and Lexus vehicles we have not been that lucky at our shop. We have tried several brands of aftermarket sensors and even used 4 new Toyota sensors and have had a very hard time programing them. For these vehicles use only Toyota OEM sensors and we suggest the dealership for programing. This has been the most successful for us.

Take care,
the Motor Medics
