The Ten Commandments

I. Thou shalt not have strange Gods before me

II. Thou shalt not take the name of the Lord thy God in vain

III. Rest on Holy Sabbath Day & Keep it Holy

IV. Honour thy father and thy mother

V. Thou shalt not kill

VI. Thou shalt not commit adultery

VII. Thou shalt not steal

VIII. Thou shalt not bear false witness against thy neighbour

IX. Thou shalt not covet thy neighbour's wife

X. Thou shalt not covet thy neighbour's goods

~ This is Ridiculous ~

What is going on in America is a downright shame to the foundations of our Constitution and the moral right of this nation's majority. And it's the American Christians who could throttle this onslaught of immorality, corruption and evil that has encroached on America's citizenry.

If the American Christians would spiritually stand up and fight from God's biblical promises, they have the power to change this ungodly advancement of disgrace against humanity and God's sovereignty over this country.

This is ridiculous to keep allowing the degrading of our society as the culture continues to dive deeper into darkness straight from hell. If only American Christians who say they are Christians would take a stand and pray and speak the truth.

This country can only be turned around from where it is heading by the power of God, and it is the American Christian who could make the difference if they would start acting like a Christian, or we are going to lose our country completely.

ASK THE MOTOR MEDICS®

Automotive Advice from the Under The Hood® Show

Dear Motor Medics,

I have a 2009 GMC Acadia with 90k miles. We picked it up as a second car for our son to drive to college because of the low miles but soon had problems. After just a week the power steering started to whine. We took the car to our dealer where we purchased it, and they said that the pump and rack and lines all had to be replaced. This was an expensive repair but with 90K miles and looking like new we thought it was a good deal. A week after the power steering repairs the transmission has started to jump when it shifts gears, and they say it needs a new transmission. The dealer says they are good cars, and this is not normal. If we have this fixed is there anything else that is common to fail on these?

Thank you,
Jackson in Selah Washington

Dear Jackson,

We have seen hundreds of this model in our shop. There are three very common issues we see on these from 09-13 with 09 being the most common of them all. Number one is transmission failure that was a known wave plate issue. Number two was power steering racks and pump, hoses just leak due to age. Number three, yes there is another big one, is the timing chains. Aside from these and once fixed these cars are usually very nice for our customers with little other trouble. Hopefully you picked it up for a good price.

Take care,
the Motor Medics

Dear Motor Medics,

I just purchased a classic car, a 1965 Ford Mustang with a V8. The car is in a fair and drivable shape, but I want it to be more comfortable to drive and I want it to stop better. What does it take to get better brakes, better front seats, and air conditioning? I would also like to think about an overdrive transmission. The car is currently an automatic.

Thank you,
Lisa in Tyler Texas

Dear Lisa,

If the car is in great shape already then adding these things will cost some cash but you can do one at a time as you choose and give a gift to yourself as you go. Brakes are a major upgrade, and kits are available to change the front drums to disc and add a power booster to give it great stopping power. Air conditioning was a under dash unit from the factory but today we would suggest a Vintage Air unit from Vintage Air who can help you get the right parts for the job. Seats in this car were low back and not comfortable or safe in our opinion. There are countless options for comfy high back seats that bolt in. Finally, an overdrive transmission. A pre-electronic 4 speed overdrive can be installed with some modifications and it will cruise nicely.

Take care,
the Motor Medics

Dear Motor Medics,

I have a 2021 Ram 1500 with a V6 engine that has a ongoing coolant leak. The leak is small and coming from the thermostat housing area. I have had the truck repair several times with both the thermostat, water pump, and then thermostat housing being replaced. The leak consumes about a pint of coolant a month. Can I use one of those cooling system sealers to fix it? I don't want to clog up the system trying to stop a leak. If I use it, how long does it last?

Thank you,
Gary in Litchfield Minnesota

Dear Gary,

We have seen this leak on multiple ram trucks in the past few years. There have been upgraded thermostat housings and thermostat covers which should fix this issue but in the colder climates we have seen multiple repeat failures. If it is still under warranty take it back to the shop that serviced it. If it is out of warranty, or you performed the work yourself and are tired of trying to seal up that small remaining leak then a sealer may be the ticket. We have had great success with a permanent leak sealer called KSeal. KSeal does not clog the system and is meant to be a permanent repair that you add to the system and leave in. Don't use it with other sealers and don't flush it out. Follow directions and if you have the results that we have seen it should stop the leak.

Take care,
the Motor Medics

Dear Motor Medics,

I'm rolling in my 2019 Toyota Corolla with custom aftermarket wheels and tires and custom vehicle wrap. Can you picture it? This thing is hot! Well, as hot as a Corolla can get. This is what I could afford as a new car when I purchased it right out of college, but it beats huge payments and I like it a lot. I have been having tire Pressure Monitor issues and the tire stores say its my car. The issue started a year after the new wheels and tires were installed and they have replaced all the sensors and can't get the system to work. Do you have any ideas?

Thank you,
Kenedy in Omaha Nebraska

Dear Kenedy,

Another Corolla with TPMS issues. This does not surprise us much. Usually, tire pressure monitor issues are a straight-forward repair. We scan the system to see which tire does not communicate with the receiver or which one is showing a fault then replace that sensor in the tire with a new one, program it, and its good to go. With the Toyotas and Lexus vehicles we have not been that lucky at our shop. We have tried several brands of aftermarket sensors and even used 4 new Toyota sensors and have had a very hard time programing them. For these vehicles use only Toyota OEM sensors and we suggest the dealership for programing. This has been the most successful for us.

Take care,
the Motor Medics
