~ Our Only Option ~

People ought to pray always because society always needs the influence of prayer. It bathes the soul in an atmosphere of the divine presence of the Holy Spirit. Prayer communes with God. Prayer goes to God to seek mercy and grace for help in a time of need.

Faith is an operation of God. Faith is an exercise of God's promises. Faith in prayer is a belief that we shall receive the very things for which we ask. Praying in faith is the condition upon which it is promised by God. Our faith must be in God alone.

God's actions toward us are, many times, determined by our actions toward God. And nothing can be substituted for our own prayer life before God. Nothing else breathes such spiritual life into our soul as real, honest prayer.

This nation stands in need of prayer, and it is up to the Christians to pray, to stand in the gap for America before it is too late.

ASK THE MOTOR MEDICS[®]

Automotive Advice from the Under The Hood[®] Show

Dear Motor Medics,

I have a 1988 Chevy truck with a 350 and Manual transmission. I have 90k original owner miles on the truck and last year I rebuilt the engine from the ground up. I was a machinist in my pre-retirement career performing race car engine builds. I worked with a younger local mechanic who has a shop and together we built it up some and added custom exhaust, a bigger cam, cold air intake, etc. After all this the truck went through three fuel pumps in the tank. The original and two more. I am not a diagnostic guy so I had a local mechanic take a look and he says that the failure is due to me using 10 percent ethanol blends in my truck and that I should never use it. Is this a real thing? I have four other cars and two of them are even older with in-tank pumps and I have never had an issue with them, and they have many more miles on them.

Thank you,
Jerry in Branson, Missouri

Dear Jerry,

The information that the mechanic has given you is not correct. Using 10 percent ethanol is the standard these days and has been for many years. IN our area it has been that way for over 30 years so if it was the issue, we would have seen many fuel pump failures. Knowing what we do about these trucks from our shop we would lean towards wiring or relay issues.

Take care,
the Motor Medics

Dear Motor Medics,

My question is about tires. I recently went to a tire store with my 1998 Ford F150 to have 4 used tires mounted on it. The tires I brought in were never used spare tires that had been removed from vehicles at a dealership about twenty years ago. The tires were for sale at an auction, and they sold over fifty of them. When I went in, they said that the tires were over twenty years old, and it was against the law to use them due to the age. They told me it was because age degrades the tires, and they could blow out causing a crash. They look new and I think they just want to sell me new tires, but they did not offer that. They just said no and sent me on my way

Thank you,
Kevin in Ogden Utah

Dear Kevin,

Well, they are right. We don't know what your specific laws are but DOT frowns upon tires that old being on the road and in some states, yes, it is not legal to use them on the road. They will break down with time even when stored indoors so for your safety and the safety of others we do not recommend using them or selling them to someone who may use them for any purpose even for trailer tires. If they are on the road, they can be a hazard. Take care and stay safe.

Take care,
the Motor Medics

Dear Motor Medics,

I'm addicted to my seat heaters. Every car I have ever purchased has had them and it has even been a deal breaker for me when shopping for a car if it did not have them. I use my heaters year-round unless it is too warm out. My driver's side seat heater just failed on my Cadillac and of course it is 2 months out of factory warranty. They would love to replace it for me at a charge of \$800.00 and that's just not going to happen. I am not ready to purchase a new car, but I want my seat heater to work. Is there anything I can do to get it going again?

Thank you,
Joe in Detroit Lakes Minnesota

Dear Joe,

I too enjoy my heated seats and when they fail, I would never think of spending \$800 just to keep my rear end warm. Good thing that there are alternatives out there. You could check with your local recycled parts place, AKA Salvage Yard, and they may have an entire working seat for you that will match your interior, or you could investigate an aftermarket heater. Seat heaters are a great accessory for anyone who has a seat to sit on. Cars, trucks, tractors, they all can be equipped with heaters usually at a much lower price than a replacement factory unit. Check your local car stereo shops or accessory installation dealer to see if they offer them.

Take care,
the Motor Medics

Dear Motor Medics,

I had the air conditioning system fail on my Land cruiser two years ago due to a large leak in the rear refrigerant lines that run under the vehicle. Where the lines run, they are susceptible to damage from road debris and those concrete stops they put at the front of parking spaces. You know, the ones with the metal stakes holding them that my teenage daughter thinks is ok to drive over instead of backing up. So, after the cloud of refrigerant smoke cleared, I took it to both the dealer and an independent shop for a repair quote. Both places were over \$1000.00 to replace the lines. They said the lines come as a set and take many hours to replace. Is there anything I can do that won't cost me so much money?

Thank you,
Rich in Attica Indiana

Dear Rich,

Ouch! You have a few choices. You can do without air conditioning, you can spend the money for new lines, you could block off the rear lines and just use the front a/c, or you can repair the lines you have. There are a/c line repair kits out in the market that not all shops have but the ones that do will be able to cut out the damaged section and splice in a new one. You can also have a rear delete kit installed. Either one will be a large savings over having the entire line set replaced.

Take care,
the Motor Medics

FOR ENTERTAINMENT ONLY • Always consult your local shop and follow all safety procedures before repairs.
