~ Is It Going to Be Too Late? ~

A high percentage of churches today will preach against sin, but only in a general sense. There is less teaching on the things of prophecy. There has been a gradual shifting by some to a social-related gospel.

I'm not saying all churches, but I am saying far too many. Today, the American church is becoming less spiritually effective in the culture, and it's proven by its overall power.

New Christian studies reveal that only 6 percent of Americans have a Biblical worldview. Church leadership has avoided controversial issues like political problems, alternative lifestyles, fornication, gender identity, holiness and the list goes on. There is hardly any mention of the demonic forces of spiritual warfare that are increasing in intensity daily.

Just how bad does it have to get- and how much freedom do we have to lose- before the American church is willing to get serious enough to go to battle on their knees? I pray that it is not too late before Christians are awakened to the spirit of revival. God help America!

ASK THE MOTORMEDICS®

Automotive Advice from the Under The Hood® Show

Dear Motor Medics,

I've got a Nissan Titan and it has a ticking noise in the engine. It has had this for about a year and it doesn't seem to get any louder, but it makes me nervous about taking it on trips far from home. When I have my engine oil changed my shop says it's just lifters and they probably are noisy because I tend to change my engine oil every 10k miles, I know, that's too long between changes. I recently put in an additive that cleans the engine oil system and the noise stopped for two weeks then came back. Should I try two cans at the same time?

Thank you,
Carry in Hills Minnesota

Dear Carry,

NO! That's the best way we can answer that last question. Never use an additive in a way not directed by the manufacturer of said product or you risk permanent damage. Additives have their place and if used as directed sometimes can fix a problem and save you a ton of money, but they are also some of the most abused products out there. With your extended oil changes, you probably clogged up some oil passages and using the cleaner helped restore them. Most of those cleaners are meant to be installed, then the engine oil changed within a few minutes of running. If that works then you may be able to repeat every 1000k miles for a few months and you may save the engine.

Take care,
the Motor Medics

Dear Motor Medics,

Hey, what gives with the low tire pressure monitors? I am so sick of these things. It seems like every vehicle I drive has a low tire light on and even when I add the correct amount of air the light still stays on. How do these things work and how can I shut the light off permanently so that I don't have to worry about it.

Thank you,
Derik in Osage Beach

Dear Derik,

Yikes! It's never any fun having a light come on and taunt you like that. Check Engine lights, ABS lights and Low Tire lights are some of the most annoying things on a car, but they all are there for a reason. They either are trying to save your life or the car's life. In the case of a low tire light, it is the former. Low tire warning systems were made mandatory by the government for safety a while back due to so many accidents caused by tire failure from under inflation. The system uses pressure sensors mounted in the tire usually on the valve stem and they contain batteries and a transmitter to relay the pressure and tire temp to the vehicles computer where it determines if it is a safe pressure and either illuminates the warning lamp or not. The system can't be bypassed, and it would not be legal to do so. Get it diagnosed. Most shops can repair them at a reasonable price.

Take care,
the Motor Medics
