5	8						6	
			2					
	4							3
4	2	5		6		9		
			3	7	1		4	

**Fun By The Numbers**  
Like puzzles? Then you'll love sudoku. This mind-bending puzzle will have you hooked from the moment you square off, so sharpen your pencil and put your sudoku savvy to the test!

**Here's How It Works:**  
Sudoku puzzles are formatted as a 9x9 grid, broken down into nine 3x3 boxes. To solve a sudoku, the numbers 1 through 9 must fill each row, column and box. Each number can appear only once in each row, column and box. You can figure out the order in which the numbers will appear by using the numeric clues already provided in the boxes. The more numbers you name, the easier it gets to solve the puzzle!

## -PUZZLE- SODOKU

## ~ The Story of the Young Boy ~

A young boy started school and struggled for several years. In the sixth grade, his teacher failed him and told his mother the boy needed help. But the mother believed her son had ability. So the young man had to take the sixth grade over again. But this time there was a new teacher, and this teacher saw something the first 6 teachers had missed. The boy had abilities that had gone unnoticed by the others. This new sixth grade teacher began to work with the boy, and he began to excel and he passed the sixth grade. He finally graduated with a straight-A average from the 7th grade to the 12th.

He then entered college where he again maintained top honors for his high scores and graduated near the top of his class. Today, this man now works in the field of media and technology support, and one of his children is a 3rd grade teacher who has never forgotten her dad's life story and looks each day into the faces of her students looking for their God-given abilities that she can come alongside and help those special students become successes.

# ASK THE MOTOR MEDICS®

Automotive Advice from the Under The Hood® Show

Dear Motor Medics,

I have a 2004 GMC Yukon and I'm having a 4x4 problem. The system will work one time then not the next. When I take it to the shop it seems to be the time that it is working correctly. The problem it has is when I switch to 4x4 high the light just blinks then it stays in the 2wd position. Sometimes when I switch to low 4x4 then back to high it will work just fine until I put it back in the 2wd position.

Thank you,  
Jack in Charleston West Virginia

Dear Jack,

Problems with systems that seem to always work when you have it in the shop are as big a pain for the mechanics as it is for you as the driver. The systems have computers that can often give codes which can help with the diagnostics, but they don't always indicate the exact cause and without the system failed at the moment it's being inspected makes it hard to diagnose and confirm repairs. The most often found issue we see when a 4x4 system in a GM truck of your model year fails like this is a failed shift motor or shift module. Both parts can be expensive so if you can get it to happen while at a shop so they can give a 100% accurate diagnosis it will go a long way to helping you save money and get it repaired right on the first visit.

Take care,  
the Motor Medics

Dear Motor Medics,

I'm a long time Under the Hood listener and I want to thank you for the great advice you guys give. I have a problem with my headlights. I drive a 2007 Chevy Impala and when I'm driving my headlights sometimes just shut off by themselves. If I pull the headlight switch out, they stay off but switching to the high beams does work but only for about two minutes then they start to blink and fail too. I tried a switch that I installed myself and it did not help.

Thank you,  
Steven in Lindsay Oklahoma

Dear Steven,

We have experienced headlight failure ourselves and it can be a scary thing. At least you have high beams so you can get off the road safely. This is actually becoming a common issue on this body style car. The headlight switches do fail quite often and your replacing of the switch may have been needed as well as the further repairs needed now. The switch connector needs to be checked during the installation of the switch. The pins in the connector tend to become burnt and fail due to high resistance and heat build-up. Make sure the pins are clean and in good shape and are not loose and replace any that are questionable. The pins can be found at a GM dealership parts department and the tool to install them at most auto parts stores. Also check your headlight socket connections.

Take care,  
the Motor Medics

Dear Motor Medics,

I'm addicted to my seat heaters. Every car I have ever purchased has had them and it has even been a deal breaker for me when shopping for a car if it did not have them. I use my heaters year-round unless it is too warm out. My driver's side seat heater just failed on my Cadillac and of course it is 2 months out of factory warranty. They would love to replace it for me at a charge of \$800.00 and that's just not going to happen. I am not ready to purchase a new car, but I want my seat heater to work. Is there anything I can do to get it going again?

Thank you,  
Joe in Detroit Lakes Minnesota

Dear Joe,

I too enjoy my heated seats and when they fail, I would never think of spending \$800 just to keep my rear end warm. Good thing that there are alternatives out there. You could check with your local recycled parts place, AKA Salvage Yard, and they may have an entire working seat for you that will match your interior, or you could investigate an aftermarket heater. Seat heaters are a great accessory for anyone who has a seat to sit on. Cars, trucks, tractors, they all can be equipped with heaters usually at a much lower price than a replacement factory unit. Check your local car stereo shops or accessory installation dealer to see if they offer them.

Take care,  
the Motor Medics

Dear Motor Medics,

I had the air conditioning system fail on my Land Cruiser two years ago due to a large leak in the rear refrigerant lines that run under the vehicle. Where the lines run, they are susceptible to damage from road debris and those concrete stops they put at the front of parking spaces. You know, the ones with the metal stakes holding them that my teenage daughter thinks is ok to drive over instead of backing up. So, after the cloud of refrigerant smoke cleared, I took it to both the dealer and an independent shop for a repair quote. Both places were over \$1000.00 to replace the lines. They said the lines come as a set and take many hours to replace. Is there anything I can do that won't cost me so much money?

Thank you,  
Rich in Attica Indiana

Dear Rich,

Ouch! You have a few choices. You can do without air conditioning, you can spend the money for new lines, you could block off the rear lines and just use the front a/c, or you can repair the lines you have. There are a/c line repair kits out in the market that not all shops have but the ones that do will be able to cut out the damaged section and splice in a new one. You can also have a rear delete kit installed. Either one will be a large savings over having the entire line set replaced.

Take care,  
the Motor Medics

FOR ENTERTAINMENT ONLY • Always consult your local shop and follow all safety procedures before repairs.
