BIG NICKEL BRAIN GAMES

-PUZZLE- SODOKU

PUZZLE NO. 1002

-DECEMBER- WEEK 4

HOW TO PLAY:

Fill in the grid so that every row, every column and every 3x3 box contains the numbers 1 through 9 only once.

Each 3x3 box is outlined with a darker line. You already have a few numbers to get you started. Remember: you must not repeat the numbers 1 through 9 in the same line, column or 3x3 box.

HOROSCOPE

WEEK OF
DECEMBER 22 TO 28, 2024

THE LUCKIEST SIGNS THIS WEEK:
SAGITTARIUS, CAPRICORN AND AQUARIUS

- ARIES**
In romantic matters, you may receive a marriage proposal, either from someone you don't know or during a trip with your partner. This week holds surprises that will be good for you.
- TAURUS**
You'll have a lot to do at work to finalize files before the holidays. However, everything will go according to plan. You'll finish off the year with a sense of accomplishment and leave with peace of mind.
- GEMINI**
You'll put the finishing touches on your holiday decorations after finding out last minute that you'll be hosting an important gathering. Your desire to outdo yourself will push you to do everything in your power to stand out.
- CANCER**
You'll find time to manage the household, take care of the children and serve as host for the get-togethers. You'll be involved in a community activity that will make you feel an extra burst of gratitude.
- LEO**
You won't mince your words this week! You'll openly express what others are thinking. You may also need to dispel some nasty gossip to prevent it from complicating your relationships.
- VIRGO**
You'll need to make more purchases, which will cause you to spend beyond your budget. However, the presents will be greatly appreciated, earning you warm thanks.
- LIBRA**
You'll need to make last-minute arrangements at work or at home. At the office, you'll be the first to arrive and the last to leave. For this, you'll earn the trust of management for an upcoming promotion.
- SCORPIO**
Be careful not to wear yourself out before the start of the holiday season. You'll have to take time to rest to get over a cold that's causing fatigue. There's nothing like an inspiring read at a time like this.
- SAGITTARIUS**
Stress at work may make you feel like you're in turmoil. Fortunately, you'll regain your self-confidence just in time for Christmas. You won't leave your good friends alone for the holidays.
- CAPRICORN**
You'll excel at work and in preparing for the holidays. You'll complete all your tasks on time. This will give you peace of mind during your time off.
- AQUARIUS**
Your friends may invite you to travel with them. You'll accept the offer without hesitation. If not, you may take part in a multicultural celebration with your loved ones during the holidays.
- PISCES**
You may feel a mix of emotions as the holidays approach. This year's celebrations will be different, evoking a sense of nostalgia that may bring out your sensitive side.

~ Which Way? ~

The Bible says in Ezekiel, As I live, says the Lord God, behold all the souls are mine of every parent, of every child, as well. Their souls are mine. The soul that sins shall die, but if a person is just and does what is right according to God's word, they will live. If they walk in God's ways and keep God's judgments faithfully, they will live. The righteousness of the righteous shall be upon themselves and the wickedness of the wicked upon themselves.

But if a sinful person turns from all of their sins which they have committed and keeps the statutes of God and obeys them, they then will surely live. They shall not eternally die and fall into hell.

Therefore, God will judge everyone according to their ways; by how they live, the words they say, and the way they have chosen by their own free will to live. The Lord says to repent and turn from your transgressions so that sin will not be your ruin. Cast away from you all your sinful ways that you commit and receive a new heart and a new spirit within you.

ASK THE MOTOR MEDICS[®]

Automotive Advice from the Under The Hood[®] Show

Dear Motor Medics,

My 2006 Ram 1500 truck is having problems while accelerating. The engine power is low when the RPM gets over 4000 RPM but is fine at a steady speed or when under 4500 RPM. My husband and I have spent a lot of time looking on YouTube, including your channel checking for easier things that we can do. We found out that it did not have a fuel filter, and we have bought a good Autel scanner so we can read codes, but there are no codes in the system. This problem came on gradually over about 5k miles and seems to be getting worse. There is only slight noise we think is coming from the drivers' side valve cover near the front. Should we pull the cover? If we do, what are we looking for?

Thank you,
Everly in Yakima Washington

Dear Everly,

Most people would not go as far as you have before reaching out to a repair shop. These Rams have had some cam issues we have seen in our shop. They tend to make some noise at first, which gets louder and increases as does the power loss. Pull that valve cover and look at all the rockers while you turn the engine over. If one or more doesn't move as much as the others there is wear present. This will cause a lack of cylinder filling and low power at higher RPM. Next, look at the cam and lifters and rockers for wear and consult a shop for the next step.

Take care,
the Motor Medics

Dear Motor Medics,

I'm trying to extend the life of my 2020 GMC 5.3 4x4 auto trans truck as long as possible, and I have started to shop for different additives which might extend its life. The truck only has 23k miles on it so it's still in perfect shape. I have been changing engine oil every 3k miles or 3 months and want your opinions on the additives and what things to maintain. Are additives worth the cost?

Thank you,
Jack in Burnsville Minnesota

Dear Jack,

With the cost of new and used vehicles being so high today many people are doing everything they can to extend the life of them. Additives are a great way to do that. While a vehicle can work just fine without them, they can last even longer, much longer when using the correct additives from good companies. The oil changes you are making are the most important but using friction reducing additives in the oil will help slow the wear process. Also, an oil system cleaner as directed will keep the engine cleaner helping to add to its life. Worn valve train components due to dirt build up are the number one cause of engine failure in our shop. Think about flushing the transmission at about 60k as preventive maintenance as well. Talk to your local shop for more information.

Take care,
the Motor Medics

Dear Motor Medics,

I have been pulling a new boat this year and its about 3000 pounds heavier than my last one. This one is 26 feet long and weighs about 10k pounds. I pull the boat with my 2011 Ford F150 Eco boost which they say is rated to pull over 11k pounds. It pulls hard, but I think that is just because it is close to its load limit. My transmission temp gauge reads about 225 after a half hour of driving and a little more on hills but the engine stays under 230. Is there anything I should do to lower the temps and make it pull easier or is it ok the way it is? I do not use overdrive and keep the RPM at about 2000 rpm just like it would read if I were at a higher speed in overdrive without the boat.

Thank you,
Lewis in Canby MN

Dear Lewis,

That's some good info for us to give you some helpful advice. Sell the truck and buy one properly equipped or get a smaller boat. No other way to get around this one. You may see some listings for your truck showing over 11k pound tow ratings but that is only with the proper gears and tow package otherwise it's much less. The readings you give are high and the rpm description does not indicate the lowest towing gears. Verify with the manufacturer for sure how your truck is equipped before towing again.

Take care,
the Motor Medics

Dear Motor Medics,

On a trip across country for the holidays this year I had a coolant leak. I purchased a gallon of coolant and made it only 50 miles before the low coolant light came on again. This time I bought 3 gallons of coolant and made it about 100 miles before the light came on, so we stopped for the day, and had it checked out where they found a leaking radiator. The engine also became hot a few times, getting into the red and displaying a message that read stop engine now. Is there any chance of engine damage? It seems to run ok. What are you supposed to do when you are on the road with the family with no place to stop and you have a leak?

Thank you,
Brad in Liberal Kansas

Dear Brad,

Some engines have a better time with overheating than others, but it is never a good thing. The hotter the engine the bigger the chance of damage to it. At this point monitor the engines running and see how it is acting. If it starts to use coolant or runs poorly it may have a problem. When you do have a coolant leak you should stop the engine as soon as possible and tow if needed. KSeal added to a cool engine can help get you to the repair shop but don't forget to carry spare coolant. It won't stop every kind of leak but can be helpful.

Take care,
the Motor Medics
