**ANNIVERSARY**  
**1975-2025** **HOT SPOT Classifieds**

**Bob Says %\*^&@!!**

**That Means:**

**Our PAIN, Your GAIN!**

**We had a GREAT End-of-Year Sale**

GoBob reps were able to help alot of customers figure out their net cost with EOY discounts and IRS Tax savings.

**MOST OF IT SOLD FOR UNDER HALF PRICE!**

In moving all that equipment around and checking serial #'s, we found some 2022 & 2023 equipment we had apparently lost track of. Squeeze chutes, hay trailers, gooseneck flatbed, a portable cattle working system and some misc pieces of cattle equipment. We even found some gates and continuous fence panels that are now weathered.

**Bob is unhappy (actually VERY unhappy) but he says: "Get rid of it before it gets older!"**

**EVERYTHING will be discounted depending on how it looks and how old it is.**

If there is something you're interested in and you like the price, we will go and take pictures of it and text or email them to you.

~ Serious Issues ~

America is a perfect example where God needs to show up in a big way, or America as we know it is going to go the way of others that have become secular because they have forgotten God.

It is said that the night before Jonathan Edwards was to preach his famous sermon, "Sinners in the Hands of An Angry God," that on that night before, any members of the Church there in Enfield, Connecticut, devoted the entire night to prayer; and the next day, God moved in such a way which began the flames of revival.

That produced the First Great Awakening in America. Today people are praying, and God does hear His people.

There is no doubt that America has serious issues and we must pray. I believe it is our country's only avenue for real help. I believe all that is holding back God's wrath is because people are still praying. The people of these United States must set aside the distractions of the world and turn their faces to God in prayer, or these United States will not stay united.

# ASK THE MOTOR MEDICS®

Automotive Advice from the Under The Hood® Show

Dear Motor Medics,

I have a 2014 Ford F-150 and the headlights feel poor to me. I have gone the route of brighter Led headlight bulbs and even installed a off road light bar to help. Adding these lights has only got me one thing. Well, two things, two tickets. People started flashing their lights at me all the time and I started flashing them back because I didn't have my high beams on. I got one ticket for the off-road light bar and one for flashing a police officer. Is there anything I can do to get better lights?

Thank you,  
Jack, in Cleveland Ohio

Dear Jack,

Headlights are a bit of a sore spot for us because of the ever-growing number of non-road legal lights being used. We drive to work every day and see no less than ten vehicles that have blinding non legal lights not to mention the ones who just don't feel they have to dim their factory lights. Two cars headed for each other at speeds over 65 MPH both blinding each other is not smart. Changing bulbs to LED in a standard housing is not legal and will blind others so are the off-road light bars. To get better light and keep everyone safe look into companies like Morimoto who offer DOT Legal headlight housings. Yes, they cost good money, but you will see much better and not cause safety issues with other drivers. These lights often are better than some very high-end cars. Those cheap Amazon units tend to be poor.

Take care,  
the Motor Medics

Dear Motor Medics,

I have a 2014 Toyota Prius that has been giving me issues lately. Sometimes it will die going down the road and display a Hybrid System Failure warning on the dash and other times it will fail to start. It seems like the colder it is outside the more it fails to start. It does nothing when the power button is pushed but all the lights come on normally and the light says ready on the dash. I have taken it into a shop twice, but it always starts for them. They had me replace the 12-volt battery in the back hatch area because it was low but that made no difference. Do you have any ideas of what may be wrong?

Thank you,  
Chris, in Vermont

Dear Chris,

What you are describing could be caused by many things but one of the most common issues is a dying high voltage battery. The high voltage battery is responsible for powering the electric drive motor and for starting the car. The car is not equipped with a regular type of starter. As you drive the car this battery pack is constantly being discharged and recharged and only has so many cycles in its life. A shop should be able to test the voltage with a scanner. Many independent shops can also replace the battery if necessary.

Take care,  
the Motor Medics

Dear Motor Medics,

I have a 1960 Ford F100, and I live in Arizona where the weather is usually great in the winter and most people would never store a vehicle during those months. However, I go north in the winter to Canada to spend time with my family from November to March. This sounds crazy, leaving warm Arizona to go north but with ten grandchildren I enjoy it more than the warm climate. My concern is with storing the F100 for those four months do I need to think about doing anything to it for storage?

Thank you,  
Vic in Scottsdale Arizona

Dear Vic,

We get less calls from southern climates about storage, but we still have plenty of people who are active military or travelers who have the same concerns as you. We like to think about both driving and storage. With a vehicle that is driven very little it can be tough on them just as storage can be. We like to keep metal fuel tanks full to prevent rust and keep an additive like Stabil for fuel storage in every tank of gas to prevent varnish in the fuel system as well as control rust. As for the battery you will want to keep a battery maintainer plugged in at all times when the vehicle is sitting even while you are home. This will help extend its life. We recommend oil changes at least once a year to prevent cardboard oil filter rot too.

Take care,  
the Motor Medics

Dear Motor Medics,

We were recently given a 1998 Honda Accord, and we want to make sure that it will last as long as possible. It only has 75k miles on it and we did get a used car inspection right after it was given to us and we were told it looks great except for a timing belt and the burnt transmission fluid. They said we should be good on the belt until 100k mile though. Do you recommend changing the fluid now or waiting?

Thank you,  
Brad in Austin Texas

Dear Brad,

Let's start with the transmission. It is normal for this year of Honda to have a darker color to the fluid soon after a flush. With that said, if it has 75k and it has not been changed it is still time to change it. The car is 26 years old after all. As long as it shifts perfectly well a fluid change should be a good thing. As for the timing belt... Whatever shop told you it's fine to go to 100k miles on a belt that is already 26 years old if it really has not been changed is giving you poor advice. Belts just do not last that long. In most cases belts like these should be changed much more often. If a belt breaks in most cars, the engine will be heavily damaged. We would change both the belt and the fluid.

Take care,  
the Motor Medics
