HOROSCOPE

WEEK OF FEBRUARY 2 TO 8, 2025

- ARIES** (♈) Get ready to be busy this week, especially if you're a parent of young children with a bustling social calendar. If you're in a relationship, a trip or romantic getaway is on the horizon, promising unforgettable moments with your special someone.
- TAURUS** (♉) Winter can really zap your energy levels. However, it's also the perfect season to unleash your creativity and create something truly inspiring and original.
- GEMINI** (♊) You'll be in the spotlight this week, which could make you feel overwhelmed, stressed or anxious at times. Take some time to recharge your batteries before the end of the week to restore your inner peace.
- CANCER** (♋) You could be given new, more important responsibilities at work. Your reliability will earn you the trust and respect of your colleagues and clients. Your reputation as a reliable professional precedes you.
- LEO** (♌) You'll feel the urge to travel or go on an adventure this week. Exciting and diverse stories will ignite your imagination. You may even consider the idea of returning to school.
- VIRGO** (♍) If you're struggling financially, your emotions are likely running high. Fortunately, solutions will soon emerge to lead you to a brighter financial future. Believe in yourself!
- LIBRA** (♎) Negotiating with those you love can be tricky. You may feel more vulnerable or unsettled when emotions are involved. Take a step back to communicate clearly and navigate the situation effectively.
- SCORPIO** (♏) Professional success is within your reach. You could draw a crowd for a specific event or score big discounts from your suppliers to boost your profits.
- SAGITTARIUS** (♐) Get ready to shine in the spotlight thanks to your incredible drive and innovative ideas. Expect to be applauded and receive some token of recognition.
- CAPRICORN** (♑) You'll spend more time at home or with your family this week. You might find yourself taking on new responsibilities, or perhaps one of your loved ones will need extra attention and care from you.
- AQUARIUS** (♒) When shopping, give yourself time to negotiate. Don't be afraid to speak up a little to make sure you're heard and respected. Expressing your emotions clearly can make a big difference in how you feel.
- PISCES** (♓) Physical activity is good for your well-being. It's a fantastic way to connect with others and enjoy shared experiences, whether it's through a fun activity or deep conversations about spirituality.

The luckiest signs this week:

~ How are you acquainted with God? ~

There are lots of people who believe they know God. If asked, they would say they believe that they know about God. But to know Him is to become very personal, and that is where I'm sure the line gets drawn.

To know God is to set aside time to really pour out of yourself. To be a personal friend that has time to spend with another friend. To put the world aside.

To get acquainted with anyone takes time. How much time do you spend with God? How often do you set aside your day and invest those moments to visit with the very One that made you, that knows all about your life from beginning to end?

He has a reason for your very existence here on earth. He knows all about you- so how well do you know Him? The Bible says no one can come to God except by the Son of God, Jesus Christ. So that is where it really all begins. Reach out to Jesus and allow Him into your life. It opens the path from knowing about God to becoming personally acquainted with Him.

ASK THE MOTOR MEDICS[®]

Automotive Advice from the Under The Hood[®] Show

Dear Motor Medics,

My old 94 Mazda B4000 Truck has started leaking coolant. I have noticed it around the upper and lower radiator hoses and from the heater box inside of the truck. It's a small amount of coolant but I must add more coolant about once a month. I'm ready to fix it and stop adding all that coolant. I'm wondering if these leaks could be just age or if they could be a bigger issue like internal rust or something that could also cause the head gasket to fail. Do you have any suggestions for this 80k mile truck?

Thank you,
Mark, in Tallahassee Florida

Dear Mark,

The miles really don't play much into this one. There is no way to tell the complete internal condition of the cooling system without complete disassembly, but you can get a quick look by removing the hoses and looking inside of the passages. If there is only light rust and scale then we would suggest starting by replacing all the coolant hoses, flushing the entire system including the heater core and replacing the thermostat. Once all of that is done, we would also add a bottle of K-Seal Ultimate to the cooling system to help prevent future leaks. It won't clog the system and if there are any small voids in the head gasket it does a good job of sealing them up by searching out pressure differentials in the cooling system. Good luck!

Take care,
the Motor Medics

Dear Motor Medics,

Hi guys, my 2013 Ford F150 EcoBoost seems to smoke a lot after it has been sitting. If I drive it every day it is not a problem but when I park it for a week or more and start it up the exhaust smokes white for a few minutes. This is worse when it is very cold outside, and it has been doing this since I bought it about two years ago and I have not had to add any oil or coolant to it. I hope you can help me.

Thank you,
Joey in Marshall Minnesota

Dear Joey,

There are many kinds of smoke that can come from a vehicle, and some are worth addressing while others are not. Blue smoke indicates that oil is being burned and can be caused by piston ring or cylinder wear or things like valve guides or turbo seals on a turbo engine like yours which have become worn. It also would be accompanied by oil usage. Then there is black exhaust smoke which indicates excessive fuel usage, a rich running condition. This is caused by too much fuel entering the engine. The problem you are having with white smoke is usually the best kind. White smoke on a gasoline engine indicates either burning coolant or normal condensation. You have said that you are not adding any fluids so it must be condensation. This is normal due to water collecting in the exhaust.

Take care,
the Motor Medics

Dear Motor Medics,

I have a 2013 Toyota SUV I am going to drive across country and back and will accumulate about 8000 miles on the odometer by the time I return. This vehicle has 45k miles on it and has not had any problems as of yet and no repairs other than tires and oil changes. Is there anything that I should do before I make the trip to be sure I am as safe as possible?

Thank you,
Tracy in Hastings, Nebraska

Dear Tracy,

Anytime you are going on an extended trip it is good to have your vehicle at its best. Many folks have disappointing trips because they failed to have a simple check done and they experience a preventable breakdown. When a vehicle is brought in for oil changes on a regular basis to your local mechanic they usually inspect for basic things like tire wear and pressure and anything out of the ordinary that could cause a failure like worn belts and hoses but not always. When preparing for a trip make sure to ask your mechanic specifically about a general check-over and tell them how far you will be traveling so they can look for things that may affect your journey. Failed tires, belts, hoses and batteries are the most common items that leave motorists stranded so be sure these are among the list of items checked before you go. Have a safe and fun trip and enjoy the ride Tracy.

Take care,
the Motor Medics

Dear Motor Medics,

I am thinking about purchasing a new Jeep Grand Cherokee with the Diesel Engine but don't know much about it. I have heard you talk about them on your radio show Under The Hood and have not heard any negatives about them from your callers. I plan to drive about 40k miles a year and haul trailers in the 4500lb range about 30k of that as I haul a display for my company to trade shows. I want the comfort of a car and good mileage but also the load hauling capability. What are your thoughts?

Thank you,
Mike in Portland, Maine

Dear Mike,

There's a number of new smaller Diesel Engines on the market that can be found in half-ton trucks and smaller SUVs meant to give better mileage when towing smaller loads where a larger more powerful diesel was not needed; these new diesels are also very clean compared to the older larger ones which is good for the environment. You have a couple of key things in your question that are important factors on a vehicle for you. First, you say you will be towing a lot of miles which justifies more power and the added cost of the diesel option. Second for better fuel mileage the use of Diesels for towing long-haul should help with your economy. You ultimately have to decide when it comes to a purchase so always research and see what others are saying before you decide.

Take care,
the Motor Medics
