Some jobs just call for six cylinders.

New Holland is the only manufacturer to offer six-cylinder performance in an all-purpose tractor, like the new T6.160 Electro-Command™. That means more torque for pulling bigger loads, and increased engine braking for downhill safety thanks to larger displacement. Plus, its 750-hour engine/1,500-hour transmission oil-change intervals maximize your uptime. The T6.160—with 115 PTO hp—features the Electro-Command semi-powershift transmission with an innovative memory shuttle, so it's ideal for material handling and light field work. Equip it with a front-end loader or attach a rotary cutter or baler and do even more.

Get more all-purpose performance in the new six-cylinder T6.160 tractor. Stop in today or visit newholland.com.

REDLINE HARROWS

Redline Harrows have proven the most effective tool in management of a variety of field and surface options such as: **Hay and Pasture Land Management:**

Mechanically stimulating hay, pasture and forage land is a proven, cost effective method to improve growth and strength of plant production. Use of the harrow to stimulate the ground will cover open seeds, speeding germination and establishment of new plants. This method is also effective for circulating dead thatch, important for decomposition and increasing speed at which nutrients are released into the soil. Use of a Redline Harrow will maximize the fertilizer benefits of existing droppings by promoting decomposition, aerating the soil, spreading nutrients, and leveling rodent mounds.
