GeoStar Energy Free Waterers

A waterer designed to be the utmost in user friendliness and clean fresh water.
 Consists of a 5'-6" tall double-wall insulated tube that is placed in the ground. This allows a large area of natural ground temperature air to surround the drinking bucket - keeping the livestock water from freezing in cold temperatures. The waterer is made of thick polyethylene plastic. The insulated lid clamps down on the base tube with 2 simple stainless steel latched with safety rings.
