## HAY STORAGE SOLUTIONS AND MUCH MORE!

"Today, I checked with Joseph to see when he was planning to deliver and construct my second hoop building. Two years ago I purchased a 55'x98' hoop building from Skylight buildings. It was erected on my site on time and the building went up in two days.

I was concerned about the durability of a vinyl building compared to a metal sided structure. That was until I noticed that a rock from my Brush Hog 2715 had impelled itself into the metal building. The Skylight building would not have been damaged. Also, the name says a lot. I thought that I would wire in lights like my other buildings but to date I have not found the need.

The reason I thought I needed to build a large building was to store my hay inside. I knew I was losing hay quality due to weather damage but baling with 568 John Deere and net wrapping my hay I thought I was keeping my hay loss at a minimum. I found the first year that I had underestimated my losses. I was very pleased with the results of storing hay inside. It is most gratifying to put a bale into the hay ring and seeing that the previous bale was almost completely consumed by the cows or the feeder calves. I had a record amount of carry over from last year and it is safely stored inside ready to be used this winter! This will allow for hay sales this winter.

The construction of the building's frame is strong, the foundation supports are 24" and very deep. I am very satisfied and have ordered another 55' x 140' to be installed in a few weeks. This one will be used to store our small square bales and equipment.

Thank you Joseph for your service and this chance to recommend your buildings."

 Special Calf & Yearling Sale

**Wednesday, May 19th**  
 Special Calf & Yearling Sale

737 head were sold at the April 21st Special Calf & Yearling Sale. Compared to the last sale two weeks ago, a light offering of feeder cattle sold with a lower undertone. Slaughter cows mostly steady with some lean cows as much as 5.00 higher. A few weights did manage to hold their ground or even tack on a few dollars but for the most part the cattle over 500 lbs stayed near the bottom to middle of the trading range from two weeks ago, several dollars away from the tops. Mostly small groups of feeders on offer. Brutal day in the futures markets with most cattle contracts down triple digits and corn and beans both closing higher again
