CANCER

This week, you'll find the motivation to tackle all the tasks you've been putting off. Evaluate your friendships. Stick to calm environments and steer clear of large gatherings.

LEO

A promotion is on the horizon! You may be given big responsibilities right from the start. Perseverance will be the key to your success. On the emotional front, expect your partner to make a grand gesture.

REDLINE HARROWS

Redline Harrows have proven the most effective tool in management of a variety of field and surface options such as:

Hay and Pasture Land Management:

Mechanically stimulating hay, pasture and forage land is a proven, cost effective method to improve growth and strength of plant production. Use of the harrow to stimulate the ground will cover open seeds, speeding germination and establishment of new plants. This method is also effective for circulating dead thatch, important for decomposition and increasing speed at which nutrients are released into the soil. Use of a Redline Harrow will maximize the fertilizer benefits of existing droppings by promoting decomposition, aerating the soil, spreading nutrients, and leveling rodent mounds.

The rich history of agriculture in the U.S. attracted colonists to the area. Since most colonists were European, the styles of agricultural cultivation and production were Europe influenced as well. Colonists also brought a large amount of livestock with them to America, which caused changes in its natural landscape. As the population grew, farms expanded, and settlements moved from the east into the west. This caused the agricultural industry to grow exponentially, with a larger variety of produce being rooted. Once the west was populated and cultivated, a wheat frontier was formed. The east was firmly set on cattle and livestock with only a handful of small-scale crops. On the other hand, the south was dominated by tobacco and cotton. Lastly, the north was dominated by people who

planted only what they needed, anything in excess was sold to the market. It was only during the Civil War and the Second World War that the agricultural system became centralized, and a proper agricultural system was introduced. The Agriculture Council of America, formed in 1973, has supported the farmers and agricultural advancements in farming techniques in the U.S. It comprises influential leaders in agriculture, food, and farming who work together as a non-profit organization dedicated to educating the world on the importance of agriculture in American Society. At the same time when the council was formed, the first National Agriculture Day was also introduced, which soon developed into an entire week-long celebration. National Agriculture Week has been celebrated ever since, with full enthusiasm to support agriculture and spread awareness about the potential and vitality of agriculture.
