Medical Weight Loss

Dr. VandeLune with Sioux Valley Family Health, is dedicated to helping people live longer, healthier lives. Our Medical Weight Loss Program is an effective solution to jump start a healthier YOU! This weight loss solution combines the use of prescription weight loss medication with the ongoing weight loss support from a trusted physician to help you achieve and maintain weight loss.

At Sioux Valley Family Health, we believe in a comprehensive approach to health and well-being. We understand that weight loss is a complex process and that there is a lot of conflicting and misleading information out there.

Dr. VandeLune will listen to your concerns and provide the knowledge and resources you need to be successful with long-term weight management. He will help you to improve your relationship with food, build the confidence and motivation you need to make life-long changes, and help you to reach your goals with healthy weight loss.

Combining our body and face contouring treatments with our semaglutide injections for weight loss will improve outcomes and lead you on your way to a healthier you!

Consistency, not perfection, is the goal of our weight loss services. The path to a healthier you begins with one small step.

We will monitor your weight loss with our InBody Scale that will measure fat, muscle and water levels.

This scale will track changes over time, help us strategize and target problem areas, and serve as motivation as you see progress in your weight loss journey.

Building muscle as you lose weight is important in driving metabolism.

Emsculpt NEO is a non-invasive treatment that simultaneously combines Radiofrequency heating and HIFEM energy to reduce fat and build muscle. This treatment helps eliminate and remove fat cells from the body while also causing muscle growth through intense muscle contractions.

Clinical studies have shown an average of 30% reduction in subcutaneous fat and a 25% increase in muscle thickness with Emsculpt Neo. Emsculpt Neo Abdominal treatments decrease visceral fat, which is the fat that wraps around organs in your belly. This fat can surround your liver, intestines, stomach, and other internal organs. Too much visceral fat increases your risk for heart disease, diabetes, and stroke.

Please call (712)225-9003 to schedule an appointment with Dr. VandeLune today!
